The advent of complex intelligent structures and low-voltage electronic installations within buildings requires increasingly sophisticated lightning protections techniques. As a multimedia book, Understanding Lightning and Lightning Protection is a unique, interactive self-teaching tool that provides an in-depth understanding of lightning protection. Understanding Lightning and Lightning Protection helps the reader to understand the propagation of waves within complex intelligent structures within buildings, and the operation of systems designed to protect these structures. It also comments on proper human behaviour during a lightning thunderstorm. Accompanied by a web-based animation program <http://www.wiley.com/go/horvath> Shows the fundamental processes of the lightning phenomenon, and helps the reader to understand the measures of protection against lightning damage. Offers a new theory and calculation method to estimate the efficiency of lightning air termination systems, which helps to evaluate the residual risk of the lightning protection system. Examines the propagation of waves and the associated protection of intelligent systems against lightning electromagnetic impulses. This interactive teaching tool is designed for senior undergraduate and postgraduate students in electrical engineering, construction, physics and meteorology. It will also provide a valuable resource for practitioners within electric power distribution, electronics, informatics & construction safety.

There have been many new developments in the ten years since the first edition of Radar and Laser Cross Section Engineering was published. Stealth technology is now an important consideration in the design of all types of platforms. The second edition includes a more extensive introduction that covers the important aspects of stealth technology and the unique tradeoffs involved in stealth design. Prediction, reduction, and measurement of electromagnetic scattering from complex three-dimensional targets remains the primary emphasis of this text, developed by the author from courses taught at the Naval Postgraduate School. New topics on computational methods like the finite element method and the finite integration technique are covered, as well as new areas in the application of radar absorbing material and artificial metamaterials. Matlab [registered] software, homework problems, and a solution manual (available to instructors) supplement the text. Written as an instructional text, this book is recommended for upper-level undergraduate and graduate students. introduction to the physics and mathematics of radar cross section in order to better understand the interdisciplinary aspects of stealth. A guide to buying a used car or minivan features information on the strengths and weaknesses of each model, a safety summary, recalls, warranties, and service tips.

[Siren Menage Everlasting: Erotic Cowboy Menage a Trois Romance, M/F/M, sex toys, HEA] Chloe Rhodes has moved from Divine to Lusty, Texas, and is getting ready to open her day spa. She's nearly over the most recent traumas in her life, too, having to break the heart of a good man and taking the life of a very bad one to save Lusty's Sheriff. Chloe has always maintained that her sister was the only one deeply troubled by their earlier tragedy. As those firemen begin to woo her, Chloe sees she has baggage she's never dealt with when the Town Trust hires investigators to solve the theft of Chloe and Carrie's inheritance by their father's business partner. As two investigators begin to dig into the past on behalf of two orphaned girls, Grant and Andrew Jessop have a bit of a mystery of their own to solve. For it seems that someone is setting grass fires in Hamilton County, right next door. And it looks like the fire bug is heading toward Lusty. Note: There is no sexual relationship or touching for titillation between or among siblings. ** A Siren Erotic Romance
