The automotive industry appears close to substantial change engendered by “ self-driving ” technologies. This technology offers the possibility of significant benefits to social welfare—saving lives; reducing crashes, congestion, fuel consumption, and pollution; increasing mobility for the disabled; and ultimately improving land use. This report is intended as a guide for state and federal policymakers on the many issues that this technology raises.

Microbial pollution is a key element of indoor air pollution. It is caused by hundreds of species of bacteria and fungi, in particular filamentous fungi (mould), growing indoors when sufficient moisture is available. This document provides a comprehensive review of the scientific evidence on health problems associated with building moisture and biological agents. The review concludes that the most important effects are increased prevalences of respiratory symptoms, allergies and asthma as well as perturbation of the immunological system. The document also summarizes the available information on the conditions that determine the presence of mould and measures to control their growth indoors. WHO guidelines for protecting public health are formulated on the basis of the review. The most important means for avoiding adverse health effects is the prevention (or minimization) of persistent dampness and microbial growth on interior surfaces and in building structures. [Ed.]

Based on the author ' s TeleSmart 10 System for Power Selling, this award-winning business book pinpoints the ten skills essential to high-efficiency, high-success sales performance in an age of telesales and digital selling. Smart Selling on the Phone and Online equips salespeople with the powerful tools they need to open stronger, build trust faster, handle objections better, and close more sales when dealing with customers they can ' t see face-to-face. You ' ll learn how to: overcome ten different forms of " paralysis " and reestablish momentum; sell in sound bites, not long-winded speeches; ask the right questions to reveal customer needs; navigate around obstacles to get to the power buyer; and prioritize and manage your time so that more of it is spent actually selling. The world of selling keeps changing, and sales professionals are on the front line of innovation to keep profits flowing. Combining an accessible text with clear graphics and step-by-step processes, Smart Selling on the Phone and Online will help any rep master the world of sales 2.0 and become a true sales warrior.

People are as interesting in painting and customizing now, as they were when this material was first created, in the 1950s. Everyone wants to know how to do a flame job, or how to run a pair of pinstripes straight down the side of their car. In this book George Barris explains how he and brother Sam did their custom painting and early flame jobs in the 1950s. No one can tell this story as well as George Barris, a fine photographer and the man who built many of the cars shown in the book. This particular book, Volume 4, contains more than just the photos and words of George Barris. This volume contains first-person side-bars by legendary painters and builders like Dean Jeffries and Larry Watson, describing how they developed their talents and what it was like to customize cars in those days.

How do organizations structure themselves? A synthesis of the empirical literature in the field, supported by numerous examples and illustrations, provides images that produce a theory. The author introduces five basic configurations of structure - the simple structure, the machine bureaucracy, the professional bu- reaucracy, the divisionalized form, and the adhocracy. This book reveals that structure seems to be at the root of many questions about organizations and why they function as they do.

David Crystal's classic English as a Global Language considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

Answers legal questions of concern to tenants and explains how to deal with a landlord who is acting unfairly
