Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant

powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Explores environmental factors during fetal development that may contribute to autism It is well documented that in the majority of the cases, an autistic child's brain has acquired the genetic and organismal abnormalities that were initiated during the first trimester of their gestational period. Yet, scientists still don't know what is causing these

abnormalities; this book explains how the human brain develops and what the critical stages are in which a fetal brain may acquire genetic and developmental abnormalities. It presents scientific data supporting previous anecdotal observations to attempt to understand the complex puzzle that is autism. From chemical fragrances to herbicides, synthetic chemicals are abundant in everyday life and this book examines the evidence surrounding these chemicals and their effects, including on the developing human brain and how that might explain certain

Recounts one of the greatest sea stories of World War II. It is the story of how George Binney, a 39 year-old civilian working in neutral Sweden when Norway was overrun by the Germans in 1940, set about running vital cargoes of Swedish ball-bearings and special steels to Britain through the blockaded Skagerrak, where German air strength was dominant and where the Royal Navy dare not trespass. Despite Admiralty gloom and in the face of

political objections that were overcome by Binney's persistence, five ships carrying a year's supply of valuable materials for the expanding British war industries were successfully sailed to Britain in January 1941. A following attempt was not as successful and ended when six ships were sunk or scuttled. But then came the saga of the Little Ships, the motor gunboats flying the Red Duster that operated out of the Humber to and from the Swedish coast in the winter of 1943/44, defying the strengthened German defences and the wrath of severe weather.
