Engineering managers and professionals make a long and lasting impact in the industry by regularly developing technology-based projects, as related to new product development, new service innovation or efficiency-centered process improvement, or both\to create strategic differentiation and operational excellence for their employers. They need certain business fundamentals that enable them to make decisions, based on both technology and business perspectives, leading to new or improved product or service offerings, which are technically feasible, economically viable, marketplace acceptable, and customer enlightening. This book consists of three sets of business fundamentals. The chapter \u201cCost Accounting and Control\u201d discusses service and product costing, activity-based costing to define overhead expenses, and risk analysis and cost estimation under uncertainty. The chapter \u201cFinancial Accounting and Analysis\u201d delineates the key financial statements, financial analyses, balanced scorecard, ratio analysis, and capital asset valuation\including operations, opportunities, and acquisition and mergers. The chapter \u201cMarketing Management\u201d reviews marketing functions, marketing forecasting, marketing segmentation, customers, and other factors affecting marketing in making value-adding contributions. The new business vocabulary and useful analysis tools presented will enable engineering managers to become more effective when interacting with senior management, and to prepare themselves for assuming higher-level corporate responsibilities.

An international edition of this product is available for sale overseas and in international markets.

This comprehensive resource offers thorough instruction on the principles of construction estimating and helps readers develop the skills they need to become professional estimators. FUNDAMENTALS OF CONSTRUCTION ESTIMATING, Fourth Edition, presents estimating procedures in a straightforward and engaging way, clearly explaining key processes of estimating and costing construction work such as quantity takeoff; pricing of contractor work, sub-trade work, and site overhead; and compiling bid documents.
