Briggs & Stratton is a Fortune 1000 manufacturer of gasoline engines with headquarters in Wauwatosa, Wisconsin. For over 100 years they have been building engines that get the job done conclusively. At Mowers-Online, we are proud to stock Briggs & Stratton Parts.

Twenty-five years ago, how many people were thinking about the internet on a daily basis? Now you can find everything, including technical and instruction manuals, online. But some things never change. Users still need instructions and warnings to guide them in the safe and proper use of products. Good design, clear instructions and warnings, place

Technology is changing the way we do business, the way we communicate with each other, and the way we learn. This new edition is intended to help technical writers, graphic artists, engineers, and others who are charged with producing product documentation in the rapidly changing technological world. While preserving the basic guidelines for developing manuals and warnings presented in the previous edition, this new edition offers new material as well, including a much-expanded section on hazard analysis. Features Provides more explicit guidance on conducting a hazard analysis, including methods and documentation Offers in-depth discussion of digital platforms, including video, animations, and even virtual reality, to provide users with operating instructions and safety information Incorporates current research into effective cross-cultural communication—essential in today's global economy Explains new US and international standards for warning labels and product instructions Presents expanded material on user analysis, including addressing generational differences in experience and preferred learning styles Writing and Designing Manuals and Warnings, Fifth Edition explores how emerging technologies are changing the world of product documentation from videos to virtual reality and all points in between.

Vol. for 1955 includes an issue with title Product design handbook issue; 1956, Product design digest issue; 1957, Design digest issue.

Our 1972 motorcycle ride took us on a four-thousand-mile trip from Arizona to Canada and back. Some nights we camped out along the highway; other nights we found a motel. Some days the rain was fierce and debilitating... but every day was fun and filled with great experiences and amazing landscapes. Each of us rode a 500cc two-stroke motorcycle on the journey. We had no cell phones, roadside assistance coverage, custom ear plugs, or sound systems. The attractions of the open road, Canada, and Yellowstone Park were very powerful. None of us worried about breaking down or the costs of the trip. We were filled with youthful confidence in ourselves and our machines. The three of us had places to go and places to see. And we made it!

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
