Written for complete beginners, this beautiful guide introduces the constellations of the northern hemisphere in a clear and memorable way.

This book by Antonio Panaino discusses the development of the Iranian cosmographical world and its interaction with the Greek, Mesopotamian and Indic civilizations.

A Walk through the Heavens is a guide to the pathways of the sky. It contains unique, simplified maps of the constellations and instructions on how to measure their sizes and the separations between them. Using this information you can find the constellations very easily and take a mind's eye journey from one constellation to its neighbours. The ancient myths and legends surrounding the constellations are retold, enriching our understanding of how historical peoples saw the awe-inspiring spectacle of a sky sprinkled with stars. Magically illustrated by Wil Tirion, this book does not assume that the reader has binoculars, and is ideal to inspire the young astronomer just starting out on a journey across the starlit skies.

Introduces the patterns of the night sky with simplified maps to guide beginners in locating the constellations and the stars within them, and includes ancient myths and legends related to the stars.

A Walk through the Southern Sky is a beautifully illustrated guide to the stars and constellations of the southern hemisphere. By following the simplified and easy-to-use starmaps, readers will be able to identify constellations with no equipment but normal sight and a clear night sky. This book provides clear instructions on how to determine star sizes and the distances between stars, allowing readers to move easily between constellations. The budding astronomer is introduced to the mystery and wonder of the southern sky as the myths and legends of its stars and constellations are wondrously retold. The third edition of this magical book features a new moon map, an updated list of planet positions, additional illustrations and more realistic star maps. It is an invaluable and beautiful guide for beginner stargazers, both young and old.
