Why haven't the poorest Africans been able to prosper in the twenty-first century? Celebrated economist George Ayittey thinks the answer is obvious: economic freedom was denied to them, first by foreign colonial powers and now by indigenous leaders with similarly oppressive practices. As war and conflict replaced peace, Africa's infrastructure crumbled. Instead of bemoaning the myriad difficulties facing the continent today, Ayittey boldly proposes a program of development--a way forward--for Africa. Africa Unchained investigates how Africa can modernize, build, and improve its indigenous institutions, and argues forcefully that Africa should build and expand upon traditions of free markets and free trade rather than continuing to use exploitative economic structures. The economic model here is uniquely African and takes little heed from the developed world; this is sure to be a highly controversial plan for moving Africa forward.

This book explores the idea of the 'Entrepreneurial University' within the institutional environment that focuses on the production, dissemination, and exploitation of knowledge. Keeping its gaze firmly on the constitutive elements of the knowledge-based institutional environment – the key actors and their interactions – the book makes important theoretical and empirical contributions to the burgeoning literature on academic entrepreneurship. The contributing chapters in the book draw insights from a range of disciplines including history, institutional and evolutionary economics, strategic management, entrepreneurship, and innovation studies to explore how institutions can create new business opportunities in turbulent times. This interdisciplinary approach has generated a rich and diverse set of insights on the idea of Entrepreneurial Universities for students, researchers, practitioners and policymakers interested in innovation and technology studies, entrepreneurship, and knowledge management.

In Africa Unchained , George Ayittey takes a controversial look at Africa's future and makes a number of daring suggestions. Looking at how Africa can modernize, build, and improve their indigenous institutions which have been castigated by African leaders as 'backward and primitive', Ayittey argues that Africa should build and expand upon these traditions of free markets and free trade. Asking why the poorest Africans haven't been able to prosper in the Twenty-first-century, Ayittey makes the answer obvious: their economic freedom was snatched from them. War and conflict replaced peace and the infrastructure crumbled. In a book that will be pondered over and argued about as much as his previous volumes, Ayittey looks at the possibilities for indigenous structures to revive a troubled continent.

This book on decolonising education chastises, heartens and invites academics to seriously commence academic and intellectual manumission by challenging the current toxic episteme – the Western dominant Grand Narrative that embeds, espouses and superimposes itself on others. It exhorts African scholars in particular to unite and address the bequests of colonialism and its toxic episteme by confronting the internalised fabrications, hegemonic dominance, lies and myths that have caused many conflicts in world history. Such a toxic episteme founded on problematic experiments, theories and praxis has tended to license unsubstantiated views and stereotypes of others as intellectually impotent, moribund and of inferior humanity. The book invites academics and intellectuals to commit to a healthy dialogue among the world's competing traditions of knowing and knowledge production to produce a truly accommodating and inclusive grand narrative informed by a recognition of a common and shared humanity.

This book is based on the 2016 Indian demonetisation. It revolves around demonetisation's objectives stated by the Government as a measure to attack on black Money, terrorism, counterfeit currency and making cash-less, further corrected to less-cash economy. The book weighed these stated objectives and assessed whether objectives will be achieved by this demonetisation. In addition to three Indian demonetisations, the book covers 18 demonetisations

across the globe and 14 demonetisation-like events. Analysed demonetisation on the basis of cost-benefit analysis, the book has also covered impact of demonetisation on major industries like FMCG, Realty, Power, infrastructure, etc. and on prime economic indicators like GDP, GVA, CRR, repo rate, inflation, etc.

Hanneke Stuit delves into Ubuntu's relevance both in South Africa and in Western contexts, analyzing the political and ethical ramifications of the term's uses in different media including literature, cartoons, journalistic fiction, commercials, commodities, photography, and political manifestos in contemporary South African culture.

Offers a historical, multidisciplinary perspective on African political systems and institutions, ranging from Antiquity (Egypt, Kush and Axum) to the present with particular focus on their destruction through successive exogenous processes including the Atlantic slave trade, imperialism, colonialism and neo-colonialism or globalization.

This book considers the new business environment of modern-day Africa, addressing how management styles must adapt to societal changes across the continent. As investment in the continent grows and African businesses begin to look beyond their own borders, there comes a real need to understand leadership from an Afro-centric perspective. This book explores the similarities and differences across African countries, compares them with other regions, and identifies particular cultural realities that managers must consider in order to be successful in the new business environment of modern Africa. Building on their Leadership Effectiveness in Africa and the African Diaspora (LEAD) research project, the authors provide an empirical understanding of African leadership styles and how businesses can harness these more effectively. Drawing on the African Diaspora's values, beliefs, and preferences, as well as anecdotal material from African academics and managers, this book grants a realistic view of leadership in various African countries including Egypt, Ghana, Nigeria, Kenya, Tanzania, Uganda, Ethiopia, and South Africa. It will be invaluable to academics, students, and anyone interested in African and global business leadership from a non-Western perspective.

Focusing on individual political thinkers and beginning with indigenous African political thought, the book successively examines African nationalism, African socialism, populism and Marxism, Africanism and pan-Africanism, concluding with contemporary perspectives on democracy, development and the African state.

In the twenty-first century, Africa has become an important source of US energy imports and the world's natural resources. It has also become the epicentre of the world's deadly health epidemic, HIV/AIDS, and one of the battlegrounds in the fight against terrorism. Africa is now a major player in global affairs.
