What is history and why
should we study it? Is there
such a thing as historical
truth? Is history a science?
One of the most accomplished

historians at work today, John Lewis Gaddis, answers these and other questions in this short, witty, and humane book. The Landscape of History provides a searching look at the historian's craft, as well

as a strong argument for why
a historical consciousness
should matter to us today.

Gaddis points out that while
the historical method is
more sophisticated than most
historians realize, it
doesn't require

unintelligible prose to explain. Like cartographers mapping landscapes, historians represent what they can never replicate. In doing so, they combine the techniques of artists, geologists, paleontologists,

Their approaches parallel,
in intriguing ways, the new
sciences of chaos,
complexity, and criticality.
They don't much resemble
what happens in the social
sciences, where the pursuit

functioning with static
systems seems increasingly
divorced from the world as

being scientific and who
isn't? This question too is
