This book provides an up-to-date account of blind children's developing communicative abilities with particular emphasis on social cognition and language acquisition from infancy to early school age. It purports to foster dialogue between those interested in the study of typically developing children and those interested in the development of children who are blind and to provide insights and new explanations of why the development of blind children may differ from that of sighted children. The book also aims to identify and examine current theoretical issues which are likely to be at the centre of developments in the fields of child language and developmental psychology. Language Development and Social Interaction in Blind Children is also a timely book. The study of blind children's development constitutes a unique opportunity to study the effect of vision on development, and more specifically on the development of language and certain aspects of social cognition. Current interest in the development of "theory of mind" and perspective taking in language learning, make the case of blind children crucial to our understanding of certain aspects of psychological functioning. The book explores these issues, challenges some widely-held beliefs about the development of communication in blind children, and provides a cohesive picture of our knowledge to date.

Case Studies in Infection Control has 25 cases, each focusing on an infectious disease, which illustrate the critical aspects of infection control and prevention. Scenarios in the cases are real events from both community and hospital situations, and written by experts. Although brief comments are included in relation to the organism, diagnosis, and treatment the main emphasis is on the case, its epidemiology, and how the situation should be managed from the perspective of infection control and prevention. Each case also has multiple choice questions and answers as well as listing international guidelines and references. All the cases will be an invaluable learning tool for anyone studying or practicing infection control.

Our differences in language, cultures, and history around the world play a vital role in the way we learn. As technology-based education continues to be used worldwide, there is an ever growing interest in how multiculturalism comes into effect. Multiculturalism in Technology-Based Education: Case Studies on ICT-Supported Approaches explores the multidisciplinary approaches to transculturality and multiculturalism and its influence on technology-based education. This comprehensive reference source is a collection of education cases which investigate transcultural education using theoretical aspects and practical applications inside a technological framework. This book aims to be a reference for university professors, students, and researchers alike.

The Instructor's Manual contains such resources as suggested class discussions and projects, designed to streamline and maximize the effectiveness of your course preparation. Numerous handouts, including ones relating the Raul Salazar case from Chapters 2 through 4 of the book, help to further illustrate concepts. The Test Bank offers many essay and multiple-choice questions.

Yost and Crawford's Fundamentals of Nursing is back for a second-edition encore! The text that made its name by focusing on simple language and active learning continues its focus on helping you truly understand, apply, and retain important nursing information and concepts. Using a warm and conversational style, this new second edition guides you towards a basic understanding of the nursing profession and then logically progresses through the nursing process and into the safe and systematic methods of applying care. Each chapter features realistic and complex case studies and critical thinking exercises woven throughout the content to help you continually apply what you've learned to actual patient care. A conceptual care mapping approach — created by Yost and Crawford themselves — further your ability to make clinical judgments and synthesize knowledge as you develop plans of care after analyzing and clustering related patient assessment data. All of this paired with a wealth of student-friendly learning features and clinically-focused content offers up a fundamentally different — and effective — way for you to easily master the fundamentals of nursing. UNIQUE! Warm, friendly writing style slows down the pace of information to give readers time to critically think and master all fundamental concepts and skills. UNIQUE! Building block approach groups topics and concepts together thematically, in the order needed for readers to build their knowledge. UNIQUE! Objective-driven approach presents clearly defined, numbered objectives that coordinate with all content and then wrap up with Objective Summaries. UNIQUE! Active learning activities are incorporated throughout every chapter to help readers learn to apply chapter content to broader nursing concepts and realistic patient scenarios. UNIQUE! Conceptual care mapping is taught and used throughout the text in conjunction with the Conceptual Care Map Creator. UNIQUE! Emphasis on QSEN reinforces the Quality and Safety Education for Nurses competencies, including: patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics. Special feature boxes cover the areas of: diversity consideration, evidence-based practice, informatics, patient education, healthy literacy, health assessment questions, interprofessional collaboration and delegation, ethical and legal practice, home care considerations, safe practice alerts, QSEN, critical thinking exercises, and nursing care guidelines. NEW! Interprofessional collaboration and delegation content appears throughout the text along with new IPE activities that are integrated into the Evolve resources. NEW & UNIQUE! Review and exam questions tied to learning objectives use a building-block style approach that starts at lower Bloom's taxonomy levels in early chapters and builds to more complex levels as readers acquire more knowledge. NEW! Emphasis on assignment and delegation covers the differences between them and how and when they're appropriate for an RN. NEW! Content on complementary therapies has been integrated throughout the text to reflect the changes to the NCLEX exam. NEW! Additional information has been added in the areas of HCAHPS, Health Literacy, Patient Education, Drugs of Abuse, Zika, Ebola, and more.

A revealing look at the pleasure we get from hating figures like politicians, celebrities, and TV characters, showcased in approaches that explore snark, hate-watching, and trolling The work of a fan takes many forms: following a favorite celebrity on Instagram, writing steamy fan fiction fantasies, attending meet-and-greets, and creating fan art as homages to adored characters. While fandom that manifests as feelings of like and love are commonly understood, examined less frequently are the equally intense, but opposite feelings of dislike and hatred. Disinterest. Disgust. Hate. This is anti-fandom. It is visible in many of the same spaces where you see fandom: in the long lines at ComicCon, in our politics, and in numerous online forums like Twitter, Tumblr, Reddit, and the ever dreaded comments section. This is where fans and fandoms debate and discipline. This is where we love to hate. Anti-Fandom,a collection of 15 original and innovative essays, provides a framework for future study through theoretical and methodological exemplars that examine anti-fandom in the contemporary digital environment through gender, generation, sexuality, race, taste, authenticity, nationality, celebrity, and more. From hatewatching Girls and Here Comes Honey Boo Boo to trolling celebrities and their characters on Twitter, these chapters ground the emerging area of anti-fan studies with a productive foundation. The book demonstrates the importance of constructing a complex knowledge of emotion and media in fan studies. Its focus on the pleasures, performances, and practices that constitute anti-fandom will generate new perspectives for understanding the impact of hate on our identities, relationships, and communities.

This focused case study analyses the roots of super-diversity in a place where immigration is an emerging phenomenon, Northwestern Spain (Galicia). It is characterized by a mostly rural population, an aging demographic, and a historically depressed economy. Yet the region has recently experienced a significant increase in immigration - a reversal of the region's historically pronounced trend of emigration. To understand immigration in its early stages, this book takes a historical approach that focuses on diversities that go beyond nationality. It explores local yet international phenomena such as different patterns of return migration, transnational community and familial relationships, and niche labour markets. The book takes a broad interdisciplinary perspective, drawing on sociology, anthropology, history, sociolinguistics, literature, and education, to provide a detailed case study analysis. While the case is specific, many other geographic regions will share some of the factors the book explores. Understanding how these factors interact will provide a useful point of contrast for analysing them in a range of other international contexts.

While water is an increasingly scarce resource, most existing methods to allocate it are neither economically nor environmentally efficient. In these circumstances, water markets offer developed countries a form of regulatory response capable of overcoming many of the shortcomings of current water management. The debate on water markets is, however, a polarized one. This is mostly a result of the misunderstanding of the roles played by governments in water markets. Proponents mistakenly portrayed them as leaving governments, for the most part, out of the picture. Opponents, in turn, understand commodification of water and administration by public agencies as incompatible. Casado Pérez argues that both sides of the debate overlook that water markets require a deeper and more varied governmental intervention than markets for other goods. Drawing an economic theories of regulation based on market failure, she explains the different roles governments should play to ensure a well-functioning water market, and concludes that only the visible hand of governments can ensure the success of water markets. Casado Pérez proves her case by examining case studies of California and Spain to assess the success of their water markets. She explores why water markets were more extensively institutionalized in California than in Spain in the first ten years since their introduction and how the role of governments in each case study impacted water market operation. This unique analysis of governmental roles in water markets, alongside qualitative studies of California and Spain, offers valuable guidance to understand environmental markets and to face the challenges presented by water management in regions with periodical droughts.
