This book comprises of 115 top consulting scenarios which you should know when you start to work in any procurement module but specifically in SRM Module in SAP.I have added these easy to understand in the one-page format which makes it easy to refer back, Keep as a side note and should be a guide for you to help you in handling most of the scenarios in SRM As per what happens in any consulting environment the issues you actually get from your client may not be included in here but after you have read through this guide, it would give you a very good base in the terms of helping you to experiment and try things out in the system directly to come closer to a resolution. These are prepared based on my notes from hundreds of meetings, being part of multiple projects, brainstorming with my colleagues and lastly to be able to provide ongoing support to my clients to manage their procurement landscape. Please note that this book focuses on building basic concepts for both Technical as well as functional people, so I recommended you go through all the pages to have a good understanding of the SRM system. If you have basic ABAP knowledge, it would be easier if not, it can be a good learning which can also be applied to other SAP modules. Although this book is geared more towards SRM as a product having worked in other modules as well, I also include some general SAP concepts which help you to apply the same knowledge in multiple other modules like MM, PM, HR and other areas. SRM has a tight integration with all the above modules, and hence it is important to have a good understanding, so you can work effectively in a collaborative environment with other team members by knowing how the other module work rather than just passing the buck. Below are the details of what the book contains - Understand the basics and best practices of procurement - Understand basics of SAP system in general for troubleshooting and support - Added scenarios from real time case studies and client specific issues - Each section is concluded with additional blog and reference links which help to understand the problem in detail - Includes ABAP technical and Functional details - Includes consulting scenarios - Includes Audit specific information - Include any relevant notes and other material - Includes some of my previously written blogs - Some code snippets which you can reuse if you implement the same scenarios In the last 2 chapters, I also try to talk about the next step for SRM and how you can transition to Ariba or other S/4 Modules in the cloud. There is also a detailed blog which I posted on SDN to help you prepare for Ariba certification.

Provides business profiles, hiring and workplace culture information at more than 40 top employers including such businesses as Microsoft.

Ariba Contract Management - SAP Certified Application Associate These questions are similar to the ones asked in the actual Test. How should I know? I know, because although I have been working as an SAP Ariba consultant for many years, I have myself recently certified with the latest version of the Certification test. Before you start here are some Key features of the Certification Exam. This certification exam verifies that the candidate has the knowledge required in the area of SAP Ariba Contract Management. This certificate builds on basic consultant skills and experience that is then refined by practical experience during several projects. Candidates must also demonstrate understanding of Contract Management Configuration, Contract Requests, Contract Authoring, Integration, Search, and Deployment Methodology. The exam is Computer based and you have three hours to to answer 80 Questions. The Questions are (mostly) multiple choice type and there is NO penalty for an incorrect answer. Some of the Questions have more than one correct answer. You must get ALL the options correct for you to be awarded points. For questions with a single answer, the answers will have a button next to them. You will be able to select only one button. For questions with multiple answers, the answers will have a 'tick box' next to them. This allows you to select multiple answers. You are not allowed to use any reference materials during the certification test (no access to online documentation or to any SAP system). Clearing the Certification will not automatically lead you to a job. However a Certification with some project experience will certainly open a lot of doors for you. So if you have little or no experience, you should get yourself certified, get some project experience, and then the whole of the SAP Consulting World open for you to explore. Helping you with the first step on you ladder to success is this book! Some UNIQUE features of this Book: - There is NO Other quality material in the market for this Certification exam. - The author has himself cleared the exam. - All questions are multiple choice format, similar the questions you will get in the actual exam. - Over 150 authentic questions, testing the exact same concepts that will be tested in Your exam!
