Basic Sciences in Ophthalmology aims to link clinical ophthalmology directly to its basic science roots. This first volume describes the physics and chemistry required for a sound understanding of modern ophthalmology. The book opens with an extensive discussion of the interaction of light with matter and the way in which light is used in ophthalmic examinations and treatments. After describing traditional methods of imaging, particular emphasis is placed on modern instrumentation such as OCT. The interaction between light and tissues in different types of laser treatment is also addressed. The chemistry section focuses

on compounds particularly relevant to the eye, such as oxygen and water. The origin and consequences of oxidative stress are reviewed, and the physical behavior of chemical compounds in the eye is explained. Understanding is facilitated through the use of many examples taken from the field of ophthalmology. The text is complemented by about 450 figures.

An indispensable and fully comprehensive textbook, this covers the basic sciences in ophthalmology and is the only book you need to pass the FRCOphth Part 1 exam.

behind ophthalmology more approachable and accessible to improve understanding. Offering full coverage of the Royal College curriculum, the book includes information on anatomy, physiology, biochemistry, and optics. Useful as a resource for the basic sciences in ophthalmology, the book will be also of interest to senior trainees, consultants, optometrists, orthoptists, and basic scientists, as well as those taking the FRCOphth exams.

A sound knowledge of basic sciences is vital for any doctor with an interest in ophthalmology, and is a significant part of all postgraduate examinations in the subject. Featuring 640 multiple choice questions, this is a comprehensive revision guide for candidates taking the basic sciences component of the FRCOphth and ICO examinations. It is highl

Online Library Basic Sciences In Ophthalmology A Self Assessment Text

This is a self-assessment book for candidates for postgraduate examinations in ophthalmology, principally the FRCOphth Part I. It covers all of the sciences fundamental to ophthalmology: anatomy (60 questions), physiology (93 questions), pharmacology (36), pathology (33) and microbiology (42). Questions are grouped according to specialty area, followed by true/false answers that are all supported with concise explanations. The book can therefore be used for learning as well as practice. The book's most innovative feature is the set of 21 structured essay plans, covering the major topics of concern in this field. It is notoriously difficult to provide model answers to essay questions, but here the authors have developed a new, highly visual approach with the consistent use of icons, to provide an at-a-glance understanding.

Online Library Basic Sciences In Ophthalmology A Self Assessment Text

- The requirements of any aspiring ophthalmologist to have a comprehensive knowledge of the basic sciences remains at the heart of clinical training. The students will thoroughly understand the anatomy, physiology and biological aspects of the eye - Practitioners are required to have a thorough comprehension of the scientific principles behind any clinical procedure and management of disorders. It provides guidance on basic principles governing every aspect of eyes and special physiological and pathological systems which a basic Ophthalmology trainee would be expected to know

FRCOphth Part 1: 400 SBAs and CRQs offers a wealth of practice questions for candidates preparing to sit the FRCOphth Part 1 exam. With so few revision resources available, this book will be an
