Prepare to learn about two things that don't seem to go together-fetishes and parties! Written by PVC Leatherman with a foreward [sic] by Randy LaBido, The Fetish Party is the ideal book for you to find out exactly how taboo activities and socially acceptable ones meet under one roof. Fetish parties are unlike any parties you experienced before! They are vastly different, yet in some ways, the same. This is your personal introduction to the fascinating, and very misunderstood, feared, and reviled world of fetish parties. And by personal, PVC Leatherman regales you with anecdotes from his night as a fetish party virgin,to now, when he is a practically an instigator and ringleader! If you are curious about the fetish lifestyle, meaning curiousenough to want to go to your first fetish party, you want to know what to expect. This book tells you what to expect whether you go alone, or not. Instead of floggers, paddles, violet wands, hot candle wax, bondage rope,

riding crops, wrist and ankle cuffs, making you nervous, you will want to experience them. Instead of thinking spankings are for children, considering getting your shoes kissed or feet worshiped is gross, or seeing a guy dressed in a corset and high heels is weird, you will realize they are different ways people have fun in nonjudgmental ways. And those kinky people in leather, latex, and vinyl, will no longer be perverts or a mystery, but friends, dancer partners, and play partners. You would no longer be on the outside. You'd be in an underworld of energy, excitement, pleasure, and pain...and loving it! Get ready to immerse yourself with all the minor and major details needed to navigate any fetish party with comfort, confidence, and ease.

America's favorite investigative reporter, John Stossel, tackles our favorite myths in his characteristic style and challenges us to look at life differently. Myths and Misconceptions covered in the book include: Is the media unbiased? Are our schools helping or hurting our kids? Do singles have a better sex life than married people? Do we have less free time than we used to? Is outsourcing bad for American workers? Suburban sprawl is ruining America. Money makes people happier. The world is too crowded. We're drowning in garbage. Profiteering is evil. Sweatshops exploit people. John Stossel takes on these and many more misconceptions, misunderstandings, and plain old stupidity in this collection that will offer much to love for Give Me a Break fans, and show everyone why conventional wisdom, economic, political, or social is often wrong.

Three brothers. . . One Empire. . . The House of Rule Damian Rule is an ultra-staid businessman who likes his life just so. He wears his hair cut short; he demands his business affairs be organized, and he insists that his women be impeccably groomed and conservative in both speech and appearance. When he meets Angie Ross for the first time, he sees a hot, beautiful, gothic mess. With her fishnet stockings and spiked leather cuffs, she's wildly inappropriate for his long term needs. But for the short term? She'll do just fine. Excerpt: Angie followed Damian's secretary across what seemed like miles of plush carpet and walked into the office when indicated. She was still in a state of shock; she'd found out in the reception area that he didn't merely work in the downtown high-rise, he owned the building. She heard the door snap closed behind her, and with her heart catching, she faltered just inside the large room. Her gaze was caught and held by dark eyes as Damian leaned against a desk of solid mahogany while standing completely still, obviously awaiting her arrival. His eyes were both sharp and hooded, his body held in a pose of relaxation that seemed inconsistent with the almost tangible electricity that radiated from him in waves. Her pulse pounding, her footsteps stalled completely. Before she could get a word out, he pushed off the desk and began to track her across the office, his muscles corded and his eyes reflecting a sheen of purpose. The space between them narrowed rapidly as his eyes fell to her throat and then scanned her body quickly before lifting to her face again. Any semblance of a smile dissolved as his expression hardened imperceptibly; a raw sizzle filled the air as his brooding features reflected a harsh, atavistic hunger that almost brought Angie to her knees as he stood not six inches away in all his tall, masculine glory. He stood almost indolently for the beat of three seconds before reaching out and seizing her with a dominant force that gave her not an ounce of choice in the matter.

a belief that human nature was under threat. The immediate result was a glut of dense, abstract books on the "nature of man." But the dawning "age of the crisis of man," as Mark Greif calls it, was far more than a historical curiosity. In this ambitious intellectual and literary history, Greif recovers this lost line of thought to show how it influenced society, politics, and culture before, during, and long after World War II. During the 1930s and 1940s, fears of the barbarization of humanity energized New York intellectuals, Chicago protoconservatives, European Jewish émigrés, and native-born bohemians to seek "re-enlightenment," a new philosophical account of human nature and history. After the war this effort diffused, leading to a rebirth of modern human rights and a new power for the literary arts. Critics' predictions of a "death of the novel" challenged writers to invest bloodless questions of human nature with flesh and detail. Hemingway, Faulkner, and Richard Wright wrote flawed novels of abstract man. Succeeding them, Ralph Ellison, Saul Bellow, Flannery O'Connor, and Thomas Pynchon constituted a new guard who tested philosophical questions against social realities—race, religious faith, and the rise of technology—that kept difference and diversity alive. By the 1960s, the idea of "universal man" gave way to moral antihumanism, as new sensibilities and social movements transformed what had come before. Greif's reframing of a foundational debate takes us beyond old antagonisms into a new future, and gives a prehistory to the fractures of our own era.

The monographs in this volume summarize the safety data on 13 pesticides that could leave residues in food commodities. These pesticides are bentazone, captan, dimethipin, fenpropimorph, fenpyroximate, fludioxinil, folpet, glyphosate, phorate, pirimicarb, propiconazole, triademefon/triademenol and trifloxystrobin. The data summarized in the toxicological monographs served as the basis for the acceptable dietary intakes and acute reference doses that were established by the Meeting.

This puzzle book contains more than 100 puzzles that are guaranteed to get your brain spinning and your mind whirring. All are set in times past and Merlin the wizard, Avalon, King Arthur and other mythical people and places feature prominently.
