better understanding of biology. Most exercises can be completed within two hours, and answers to the exercises are included in the Instructor's Manual. The perfect companion to Starr and Taggart's **BIOLOGY: THE UNITY AND DIVERSITY OF LIFE**, Eleventh Edition, as well as Starr's **BIOLOGY: CONCEPTS AND APPLICATIONS**, Sixth Edition, and **BIOLOGY: TODAY AND TOMORROW**, this lab manual can also be used with any introductory biology text.

Visualizing Human Biology Lab Manual provides 18 labs specifically designed for the non-majors biology student, each of which engages students by focusing on the structure and function of each person's own unique body. The lab manual includes key experiments with step-by-step visual guides and more interesting, real world topics to connect with students' diverse experiences. Visuals are used to teach and explain, not just illustrate, and students with varied learning styles will be engaged. The applications of common laboratory techniques in science, medicine, and everyday life are also explored in each lab topic.

One of the best ways for your students to succeed in their biology course is through hands-on lab experience. Teacher's Guide to accompany *Biology: A Search for Order in Complexity*. This teacher's guide will equip instructors to lead their students through the various experiments that are featured in the student laboratory manual.

With its distinctive investigative approach to learning, this best-selling laboratory manual encourages you to participate in the process of science and develop creative and critical reasoning skills. You are invited to pose hypotheses, make predictions, conduct open-ended experiments, collect data, and apply the results to new problems. The Seventh Edition emphasizes connections to recurring themes in biology, including structure and function, unity and diversity, and the overarching theme of evolution. Select tables from the lab manual are provided in Excel® format in MasteringBiology® at [www.masteringbiology.com](http://www.masteringbiology.com), allowing you to record data directly on their computer, process data using statistical tests, create graphs, and be prepared to communicate your results in class discussions or reports.

This four-color lab manual contains 21 lab exercises, most of which can be completed within two hours and require minimal input from the instructor. To provide flexibility, instructors can vary the length of most exercises, many of which are divided into several parts, by deleting portions of the procedure without sacrificing the overall purpose of the experiment. Taking a consistent approach to each exercise, the second edition provides an even clearer presentation, updated coverage, and increased visual support to enable students to apply concepts from the Human Biology course.
