Professor Pinel is an award-winning teacher and the author of more than 200 scientific papers. However, he feels that Biopsychology is his major career-related accomplishment: “It ties together everything I love about my job: students, teaching, writing, and research.” Steven J. Barnes obtained his Ph.D. from the University of British Columbia. He then worked as a postdoctoral fellow — first in the Department of Epileptology at the University of Bonn and then in the School of ...

Author John Pinel and his artist/designer wife, Maggie Edwards, created many of these illustrations exclusively for this text. While some biopsychological textbooks emphasize neurophysiology, neurochemistry, and neuroanatomy, Biopsychology gives top billing to coverage of behavioral research. The authors stress that neuroscience is a team effort and that the unique contribution made by biopsychologists to this effort is their behavioral expertise.

manner, Pinel's *Biopsychology* introduces the fundamentals of modern biopsychology. The fourth edition has been thoroughly updated to keep *Biopsychology* abreast of the many recent developments in this rapidly changing field. Despite the significant infusion of new material, Pinel's text continues the tradition that has made it such a success: clear, engaging prose; an unwavering emphasis on behavior; an attractive, superbly designed and integrated illustration package; and insight-provoking accounts of modern biopsychological research.

Pinel's textbook presents the fundamentals of the study of the biology of behaviour and makes the topics personally and socially relevant to the student. A key feature of
