Harley-Davidson sets the standard for making great motorcycles--and showing people how to enjoy them. Here's its story.

How to Build a Cheap Chopper was originally written to give chopper builders of the day a way to build cool, functional choppers for cheap money. Instead of building bikes out of a catalogue, readers were encouraged to combine a donor bike with an aftermarket frame. With a Sportster or Metric bike as a foundation, and a hard-tail frame, a complete bike could be assembled for less than \$5,000, sometimes much less. Today, there's a whole new generation of riders looking to build simple, functional, unique choppers and bobbers based on everything from a 200cc Honda to the old classic Shovelhead or Panhead engines. No matter which drivetrain they choose, there remains the need to build bikes that work, bikes that are safe to ride, bikes that are fun! How to Build a Cheap Chopper- Revised starts with a look at the basics. The first chapters cover brakes, drivetrains, and frame geometry. The second half of the book shows readers how to actually assemble a bike. Four start-to-finish assemblies done at professional shops take the reader from a pile of parts to a finished, running motorcycle.

From electronic ignition to electronic fuel injection, slipper clutches to traction control, today's motorcycles are made up of much more than an engine, frame, and two wheels. And, just as the bikes themselves have changed, so have the tools with which we tune them. How to Tune and Modify Motorcycle Engine Management Systems addresses all of a modern motorcycle's engine-control systems and tells you how to get the most out of today's bikes. Topics covered include: How fuel injection works Aftermarket fuel injection systems Open-loop and closed-loop EFI systems Fuel injection products and services Tuning and troubleshooting Getting more power from your motorcycle engine Diagnostic tools Electronic throttle control (ETC) Knock control systems Modern fuels Interactive computer-controlled exhaust systems

GSX-R600 (1997-2000)

Considered by many professional mechanics to be the final word on the subject of bicycle repair.
A startling, wonderful novel about the true meaning of being an alien in an equally alien world. "We are specks. Pieces of dust in this universe. Big nothings." "I know what I am." Mal lives on the fringes of high school. Angry. Misunderstood. Yet loving the world -- or, at least, an idea of the world. Then he meets Hooper. Who says he's from another planet. And may be going home very soon.
Herbie Brennan's popular and critically acclaimed Faerie Wars series is well known for its cast of magical characters, hilarious dialogue, and wildly inventive flights of fantasy. Now, with The Faeman Quest, Brennan returns to the world of Faerie to introduce a new character - Mella, the daughter of King Consort Henry and Queen Holly Blue. When Mella accidentally travels to the country of Haleklind, she discovers rebel forces preparing an invasion using a terrifying new magical weapon. This novel features old favorites-Brimstone, Pyrgus, and Lord Hairstreak's head-but readers will identify immediately with Mella, whose stubborn streak and feisty daring must save the Faerie realm from mass destruction.
