Business Law, 5th Edition (James et al.) is written for business students to provide a clear and accessible introduction to the legal system. Business law courses are the first exposure to law for many business students and the first time they are obliged to think deeply about the discipline. This updated edition presents business law in a practical context rather than the doctrinal context that many major legal publishers use. The Business Law interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Herbert Smith Freehills, animated work problems and questions with immediate feedback. This new edition is a unique resource that can form the basis of a blended learning solution for lecturers.

Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum.

And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.

Getting the right legal forms can cost you thousands of dollars in attorney's fees-but using the wrong forms can cost you even more. typical semester, making it possible to use the entire textbook and cover all relevant business law topics in appropriate depth. No need to customise this textbook to suit the subject outline. Presents a functional rather than doctrinal approach, e.g. instead of 'tort law' and 'contract law', the chapters look at 'causing harm' and 'making deals'. Activity features appear throughout requiring students to reflect, research, apply or revise their understanding of legal concepts. Revision questions appear at the end of each major chapter section and provide an opportunity for students to check their knowledge before progressing. End-of-chapter quizzes contain multiple-choice questions and are ideal for self testing. Over 600 terms & definitions included in the end of book glossary. New to this Edition: Each chapter begins and ends with "Johnny and Ash" ? a framing narrative which establishes the importance and relevance of the business law concepts presented, by describing a particular problem or situation. This feature appears in each chapter and involves a range of scenarios between two characters: Johnny, a restaurant owner, and Ash, a solicitor. Johnny and Ash begin each chapter by discussing one of more of the key issues explored within the chapter, and conclude each chapter with the resolution of those issues. They do so in a way which grounds these key issues in the real world, demonstrating how and why these issues might arise in business practice. The various scenarios link together into a continuing storyline, engaging the students' interest as they progress from chapter to chapter. Chapter 3 Exercising legal skills describes and develops important legal skills such as research, reading,

interpretation and writing. This is an important chapter, not found in most introductory business law textbooks. Where appropriate, tables, diagrams, flowcharts and concept maps are used to illustrate the more complex material within the text. Each chapter is periodically punctuated with questions which require the student to either reflect, research or revise key points. These questions ensure that students engage with the text actively rather than passively. Each section within a chapter concludes with a set of revision questions testing the student's ability to recall the key points from the section. Key terms used in the text are defined in the margins and in the comprehensive glossary at the end of the book. Throughout the text the student is referred to the many useful online resources relevant to the practice of business law in Australia. "Law in context" boxes offer alternative perspectives on the law described in the main text. These perspectives include the operation of the law in practice, ethical perspectives, the portrayal of the law in popular culture, philosophical or historical perspectives on the law, insights upon the law from other disciplines such as economics or social science, the political context within which the law was developed and the law in a global context. Each chapter concludes with a set of quiz questions for students to test their own understanding of the content, as well as a set of exercises where the student can apply their knowledge to the solution of particular legal problems or further explore more challenging aspects of the law.
