The PA of Acupuncture provides the reader with a brief overview of the history of acupuncture in China and Europe, it describes the underlying principles of Chinese medicine and how it differs from Western medicine, and it looks at the way Western medicine attempts to explain the effects achieved by acupuncture therapy. The main focus of this book is the presentation of the 361 classic acupuncture points giving details of their locations, the way they are classified, their actions and indications, as well as the needling techniques to be used. On the pages facing the descriptions, there are precise anatomical drawings showing the paths of the channels and the points located on them.

The 6th Edition of TODAY'S TECHNICIAN: AUTOMOTIVE BRAKE SYSTEMS is a comprehensive text that equips readers to confidently understand, diagnose, and repair today's brake systems. Using a unique two-volume approach, the first volume (Classroom Manual) details the theory and application of the total brake system, subsystem, and components, while the second (Shop Manual) covers real-world symptoms, diagnostics, and repair information. Known for its comprehensive coverage, accurate and up-to-date details, and abundant illustrations, the text is an ideal resource to prepare for success as an automotive technician or pursue ASE certification. Now updated with extensive information on new and emerging technology and techniques—including hybrid vehicles, brake by wire, and electric brakes—the Sixth Edition also aligns with the NATEF 2012 accreditation model, including job sheets correlated to specific AST and MAST tasks. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
