Case Studies - Loughborough University

Case studies are commonly used in social, educational, clinical, and business research. A case study research design usually involves qualitative methods, but quantitative methods are sometimes also used. Case studies are good for describing, comparing, evaluating and understanding different aspects of a research problem.

Renault, Samsung, Lacoste This book provides opportunities to discover a selection of issues recently faced by 10 major French companies. Each case offers in a clear and structured manner: a case presentation sheet including the problem statement, learning objectives, as well as the main themes and marketing tools used throughout the case; a narrative reviewing important information about the company and its environment, leading to the problem to be investigated; a series of questions guiding the draft of a structured solution; a detailed solution outlining the main strategic recommendations. Based on real issues and written in collaboration with the companies, the 10 field-based case studies allow applying marketing principles, theories and models: segmentation, positioning, marketing plan, as well as designing strategies at the product, price, place and promotion levels. Learning by doing, applied to marketing!"

Human health depends on the health of the planet. Earth's natural systems--the air, the water, the biodiversity, the climate--are our life support systems. Yet climate change, biodiversity loss, scarcity of land and freshwater, pollution and other threats are degrading these systems. The emerging field of planetary health aims to understand how these changes threaten our health and how to protect ourselves and the rest of the biosphere. Interdisciplinary in nature, Planetary Health explores how accelerating environmental change affects each dimension of human health. It then turns to the rich terrain of solutions, reimagining our cities, our food systems, our energy sector, the chemicals we use, even our economics and our ethics. The result is a comprehensive and optimistic introduction to a field that is being adopted by researchers and universities around the world.

The process of creating graphic design cannot be easily defined: each designer has their own way of seeing the world and approaching their work. Graphic Design Process features a series of in-depth case studies exploring a range of both universal and unique design methods. Chapters investigate typical creative strategies [Research](#), [Inspiration](#), [Drawing](#), [Narrative](#), [Abstraction](#), [Development](#) and [Collaboration](#) [examining](#) the work of 23 graphic designers from around the world. Work featured includes projects by Philippe Apeloig, Michael Bierut, Ed Fella, James Goggin, Anette Lenz, Johnson Banks, Me Company, Graphic Thought Facility, Ahn Sang-Soo and Ralph Schraivogel. This book is aimed at students and educators, as well as practising designers interested in the working methodologies of their peers.

The book provides a technique for solving case studies and offers several case studies set in Indian environment covering the entire gamut of courses in Marketing Management. This revised edition is a part of a series on case study solutions. Besides st

Managers and supervisors will sharpen their analytical and decision-making skills with this new collection of fully reproducible case studies. Training Objectives: Improve participant's listening skills; Empower employees to negotiate; solutions fairly; Provide opportunities for participants to practice new skills in a supportive environment; Illustrate the skills needed to respond productively to complex issues. Activities Cover: Performance appraisal; Managing effectively; Sexual harassment/discrimination; Managing disruptive employees; Coaching/counseling employees; Hiring the right person

Provides an approach for analyzing, discussing, and writing about cases. This book shows how to classify cases according to analytical task they require (solving a problem, making a decision, or forming an evaluation) and establish a base of knowledge about a case. It shows how to talk about cases in class.

Case Studies on Diversity and Social Justice Education offers pre- and in-service educators an opportunity to analyze and reflect upon a variety of realistic case studies related to educational equity and social justice. The accessibly written cases allow educators to practice the process of considering a range of contextual factors, checking their own biases, and making immediate- and longer-term decisions about how to create and

sustain equitable learning environments for all students. This revised edition adds ten new cases to offer greater coverage of elementary education, as well as topics such as body-shaming, Black Lives Matter, and transgender oppression. Existing cases have been updated to reflect new societal contexts, and streamlined for ease-of-use. The book begins with a seven-point process for examining case studies. Largely lacking from existing case study collections, this framework guides readers through the process of identifying, examining, reflecting on, and taking concrete steps to resolve challenges related to diversity and equity in schools. The cases themselves present everyday examples of the ways in which racism, sexism, homophobia and heterosexism, class inequities, language bias, religious-based oppression, and other equity and diversity concerns affect students, teachers, families, and other members of our school communities. They involve classroom issues that are relevant to all grade levels and content areas, allowing significant flexibility in how and with whom they are used. Although organized topically, the intersections of these issues are stressed throughout the cases, reflecting the complexities of real-life scenarios. All cases conclude with a series of questions to guide discussion and a section of facilitator notes, called "Points for Consideration." This unique feature provides valuable insight for understanding the complexities of each case.

Case Study Research: Principles and Practices aims to provide a general understanding of the case study method as well as specific tools for its successful implementation. These tools can be utilized in all fields where the case study method is prominent, including business, anthropology, communications, economics, education, medicine, political science, social work, and sociology. Topics include the definition of a 'case study,' the strengths and weaknesses of this distinctive method, strategies for choosing cases, an experimental template for understanding research design, and the role of singular observations in case study research. It is argued that a diversity of approaches - experimental, observational, qualitative, quantitative, ethnographic - may be successfully integrated into case study research. This book breaks down traditional boundaries between qualitative and quantitative, experimental and nonexperimental, positivist and interpretivist.

This book blends classroom training with actual practice. It provides case studies for the students of Management, Commerce, Chartered Accountancy, and Cost and Work Accountancy. It contains case studies pertaining to Indian conditions and their suggeste
