An Ingredient Brand is exactly what the name implies: an ingredient or component of a product that has its own brand identity. This is the first comprehensive book that explains how Ingredient Branding works and how brand managers can successfully improve the performance of component marketing. The authors have examined more than one hundred examples, analyzed four industries and developed nine detailed case studies to demonstrate the viability of this marketing innovation. The new concepts and principles can easily be applied by professionals. In the light of the success stories of Intel, GoreTex, Dolby, TetraPak, Shimano, and Teflon it can be expected that component suppliers will increasingly use Ingredient Branding strategies in the future.

This is the first book on mathematical simulation on glass technology, and covers all production steps of special glass manufacturing. The enclosed CD-ROM shows 27 simulations of different aspects, such as surprising details of the pressing and casting process.

Accessible and generously illustrated in full colour, this reference spans the history of glass, the raw materials and the manufacturing process, as well as its many products. Informative and compact, this convenient guide is appropriate for anyone interested in glass. Revised throughout for this new edition.

This vintage book contains a simple, concise guide to bottling fruit and vegetables, including simple step-by-step instructions and a selection of recipes and articles on the subject. This detailed guide will be of considerable utility to those with a practical interest in preserving home-grown produce. It will make for a worthy addition to any collection of fruit growing literature. Although old, the information contained within its pages will be useful to the modern reader, making it both a handy resource and an appealing text for collectors. The chapters of this volume include: 'Bottling Soft Fruits', 'Bottling Stone Fruits', 'Bottling Various Fruits and Vegetables', 'Fruit Bottling', 'Home Bottled Fruits and How to do Them', and 'Bottling or Canning'. We are republishing this vintage text now in an affordable, modern edition - complete with a specially commissioned introduction on food preservation.

This is one of the first books to probe deeply into the art and science of branding industrial products. The book comes at a time when more industrial companies need to start using branding in a sophisticated way. It provides the concepts, the theory, and dozens of cases illustrating the successful branding of industrial goods. It offers strategies for a successful development of branding concepts for business markets and explains the benefits and the value a business, product or service provides to industrial customers. As industrial companies are turning to branding this book provides the best practices and hands-on advice for B2B brand management.

A comprehensive guide to home preserving and canning in small

batches provides seasonally arranged recipes for 100 jellies, spreads, salsas and more while explaining the benefits of minimizing dependence on processed, store-bought preserves.

Presents a collection of recipes for crêpes, with a range of fillings and sauces for meat, vegetable, and dessert dishes, with instructions for creating the basic crêpe and several variations.

Thin-layer chromatography (TLC) is a powerful, fast and inexpensive analytical method. It has proven its usefulness in pharmaceutical, food and environmental analysis. This new edition of the practical TLC guide features a completely revised chapter on documentation, now including the use of digital cameras. Selected new sorbents and instruments are also introduced. Why has the prior edition been successful? All steps of the analytical procedure are clearly explained, starting with the choice of a suitable TLC technique and ending with data evaluation and documentation. Special emphasis is put on the proper choice of materials for TLC. Properties and functions of various materials and the TLC equipment are described, covering e. g. precoated layers, solvents and developing chambers, including information on suppliers. Many practical hints for trouble shooting are given. All this is illustrated with numerous coloured figures. How to use TLC in compliance with GLP/GMP regulations is described in detail, including the required documentation. Therefore the reader can very easily compile his own standard operating procedures.
