MasteringEngineering. The most technologically advanced online tutorial and homework system. MasteringEngineering is designed to provide students with customized coaching and individualized feedback to help

Acces PDF

Chapter 4

improve problem-solving skills while providing instructors with rich teaching diagnostics.

This compact and easy-to-read text provides a clear analysis of the principles of equilibrium of rigid bodies in statics and dynamics when they

Acces PDF

Chapter 4

are subjected to external mechanical loads. The book also introduces the readers to the effects of force or displacements so as to give an overall picture of the behaviour of an engineering system. Divided into two parts-statics and dynamics-the book

Acces PDF

Chapter 4

has a structured format, with a gradual development of the subject from simple concepts to advanced topics so that the beginning undergraduate is able to comprehend the subject with ease. Example problems are chosen from engineering practice and all the steps

Acces PDF

Chapter 4

Solutions the
solution of a problem
are explained in
detail. The book also
covers advanced
topics such as the use
of virtual work
principle for finite
element analysis;
introduction of
Castigliano's theorem
for elementary
indeterminate
analysis; use of

Acces PDF

Chapter 4

Lagrange's equations for obtaining equilibrium relations for multibody system; principles of gyroscopic motion and their applications; and the response of structures due to ground motion and its use in earthquake engineering. The book has plenty of

Acces PDF

Chapter 4

exercise problems-
which are arranged in
a graded level of
difficulty-, worked-
out examples and
numerous diagrams
that illustrate the
principles discussed.
These features along
with the clear
exposition of
principles make the
text suitable for the
first year
