What would happen if you... ...forbade everyone in your company from ever saying "no" to a customer?  
...posted your contact information on the company's public website and required all of your executives and department managers to do the same? ...turned cash planning from a financial exercise into an operational priority where the VP of Finance was the last to weigh in? ...paid your customers to read your advertisements?  
...took a huge pay cut rather than lay off employees?

This book offers the first comprehensive look at CPRs as they relate to PT practice. It ' s format is arranged so that the pertinent information is readily available to influence clinical decision making while also providing sufficient depth. CPR development level is provided, a quality assessment score is listed as well as a clinical

bottom line paragraph to provide the reader with a summative statement. The predictor variables are well described and include multiple color pictures for clarity of explanation and ease of reproduction. To further assist the reader in their utilization of clinical prediction rules the authors have provided a decision making algorithm as well as multiple case studies demonstrating the inclusion of such rules into an evidence-based clinical scenario. CPRs are becoming more frequent in the PT literature and this book provides students and clinicians with a strong working knowledge of the rules most pertinent to PT practice.

Personal protective equipment (PPE) is the final barrier between the electrical worker and possible injury or electrocution. Developed as a practical, easy-to-use reference, *A User's Guide to Electrical PPE* skillfully defines and discusses the various types of equipment and components that provide protection from electrical hazards. Leading safety expert and Chairman of the NFPA 70E Committee, Ray A. Jones expertly describes the construction, testing, and storage requirements for personal protective equipment defined by consensus standards so users are able to identify what PPE is available, the purpose of each type of PPE, how to select PPE for specific jobs, and how to care for PPE to ensure its reliability.

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

This technical report covers work performed under Air Force Contract F33600-87-C-0464, DAPro Project. This contract is sponsored by the Manufacturing Technology Directorate, Air Force Systems Command, Wright-Patterson Air Force Base, Ohio. It was administered under the technical direction of Mr. Bruce A. Rasmussen, Branch Chief, Integration Technology Division, Manufacturing Technology Directorate, through Mr. David L. Judson, Project Manager. The Prime Contractor was Integration Technology Services, Software Programs Division, of the Control Data Corporation, Dayton, Ohio, under the direction of Mr. W.A. Osborne. The DAPro Project Manager for Control Data Corporation was Mr. Jimmy P. Maxwell. The DAPro project was created to continue the development, test, and demonstration of the Integrated Information Support System (IISS). The IISS technology work comprises enhancements to IISS software and the establishment and operation of IISS test bed hardware and communications for developers and users.
