Coming from a 3.9 GPA student who is very interested in Physics and even considering a Physics minor (pre-med first baby. :D), all I can say is... wow. Serway and Faughn have messed up royally with this textbook. I've never read a textbook that was so difficult to comprehend. They do a poor job of writing for the student.

straightforward approach to course material. The text includes in-depth examinations of low-temperature physics, superconductivity, relativity, and the top quark. MP DESKTOP interactive software, written by the authors, allows students to explore key physics concepts and problems.

Building upon Serway and Jewetta's solid foundation in the modern classic text, *Physics for Scientists and Engineers*, this first Asia-Pacific edition of *Physics* is a practical and engaging introduction to *Physics*. Using international and local case studies and worked examples to add to the concise language and high quality artwork, this new regional edition further engages students and highlights the relevance of this discipline to their learning and lives.
