I wasn't sure what changed my mind about giving London to Bones, but something did. Now London is officially mine. She's sassy, feisty, and she still tells me off when I have her under my thumb. I love it. Now I have a deal with the Barsetti brothers, Josephine is still pining for me, and revenge is heavy on my mind. I'm not sure what to do with London now that I'm not gonna kill her. But I'm certainly not going to fall in love with her.

From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters? The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. *Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

Prominent feminist author Barbara Walker has revamped, retold, and infused with life some of your favorite classic fairy tales. No longer are women submissive, helpless creatures in need of redemption through the princely male! Instead they are vibrantly alive, strong women who take fate into their own hands.
