Tony has it all: a rich, hot boyfriend, a McMansion in the 'burbs and unlimited sex in an expectation-free zone. Then Jack begins making excuses for frequent disappearances. Realizing he has more than his libido riding on this relationship, Tony figures it's time to find out what's going on. Jack Noble has spent his life hiding his real self behind a carefully created image. With Tony, he finally knows real freedom, real happiness. Now a past of buried secrets and lies is closing in, and no matter how hard he tries to stop it, the truth is tearing through. Once Tony learns what kind of man Jack really is, he won't stay. Jack's sure of it. Suddenly the past shows up in a completely unexpected way, testing the boundaries of their old, coasting-along-on-fun relationship. Tony indeed finds that Jack isn't the man he went looking for, but it's too late. There's too much at stake to just walk away. First, though, he has to make sure there are no lies left for Jack to hide behind.

Monocular Model-Based 3D Tracking of Rigid Objects reviews the different techniques and approaches that have been developed by industry and research.

A companion book to the PBS-TV series illuminates the basics of jazz and classical music through anecdotes and examples, aimed at both children and adults

It all starts with the release of fidgety, suspicious Percy Talbot from state prison after serving a five-year sentence. We don't know why, only that she's released and on her way to Gilead and its "colors of paradise." But when she arrives it is February and bitter cold, and the only one around to meet her is restless Sheriff Joe Turner, who takes her to the Spitfire Grill to help the aging Hannah Ferguson run the diner. All is gray, dismal and listless around them, and the characters are in the "winter of their lives" emotionally and spiritually.

In the Old Testament, God's people saw Him in a cloud by day and a pillar of fire by night. In the New Testament, the religious world thought they had God in a box behind the veil. When Jesus died, the veil was rent and God went public. In an ever changing world where the darkness prides itself by proclaiming they have psychic insights for every person, the church has become anemic, without as much as a sign, a miracle or a wonder. Where do we go from here? Faith is at a level the church has never known before. It is a faith being seen in the "here and now." We must understand what Jesus meant when He said, "I only do what I hear and what I see My Father do and say." You are about to enter that eternal zone, where time is losing its grip on the earth. Eternity is Invading Time.

This book will present the papers delivered at the first U.S. conference devoted exclusively to global optimization and will thus provide valuable insights into the significant research on the topic that has been emerging during recent years. Held at Princeton University in May 1991, the conference brought together an interdisciplinary group of the most active developers of algorithms for global optimization in order to focus the attention of the mathematical programming community on the unsolved problems and diverse applications of this field. The main subjects addressed at the conference were advances in deterministic and stochastic methods for global optimization, parallel algorithms for global optimization problems, and applications of global optimization. Although global optimization is primarily a mathematical problem, it is relevant to several other disciplines, including computer science, applied mathematics, physical chemistry, molecular biology, statistics, physics, engineering, operations research, communication theory, and economics. Global optimization problems originate from a wide variety of mathematical models of real-world systems. Some of its applications are allocation and location problems and VLSI and data-base design problems. Originally published in 1991, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

A comprehensive and granular insight into the challenges of promoting rational medicine, this book serves as an essential resource for health policy makers and researchers interested in national medicines policies. Country-specific chapters have a common format, beginning with an overview of the health system and regulatory and policy environments, before discussing the difficulties in maintaining a medicines supply system, challenges in ensuring access to affordable medicines and issues impacting on rational medicine use. Numerous case studies are also used to highlight key issues and each chapter concludes with country-specific solutions to the issues raised. Written by highly regarded academics, the book includes countries in Africa, Asia, Europe, the Middle East and South America.

This powerful drama examines the fears of parents driven to do "the right thing" when the safety of their daughter is in doubt. A mother and father who learn that the next door neighbor is a convicted child molester consider both vigilance and vigilantism before being forced into action by a pair of child advocacy crusaders. The shocking climax hits a raw nerve, leaving the audience to consider where the line between right and wrong lies. Mr. Bundy was a hit at the 1998 Humana Festival at Actors Theatre of Louisville. -- Publisher's website.

Consisting of two parts, this book presents papers describing publicly available stochastic programming systems that are operational. It presents a diverse collection of application papers in areas such as production, supply chain and scheduling, gaming, environmental and pollution control, financial modeling, telecommunications, and electricity.
