The Challenge Built
to Last, the
defining
management study
of the nineties,
showed how great
companies triumph
over time and how
long-term
sustained
performance can
be engineered into
the DNA of an
enterprise from the

Download Free Detailed Index

very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind

Download Free Detailed Index

of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The

Download Free Detailed Index

Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies

Download Free Detailed Index

generated
cumulative stock
returns that beat
the general stock
market by an
average of seven
times in fifteen
years, better than
twice the results
delivered by a
composite index of
the world's
greatest
companies,

Including Coca-Cola, Intel, General Electric, and Merck.

The Comparisons

The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was

Download Free Detailed Index

different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting

Download Free Detailed Index

through mountains
of data and
thousands of pages
of interviews,
Collins and his
crew discovered
the key
determinants of
greatness -- why
some companies
make the leap and
others don't. The
Findings The
findings of the

study will surprise
many readers and
shed light on
virtually every area
of management
strategy and
practice. The
findings include:
Level 5 Leaders:

required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline

with an ethic of entrepreneurship, you get the magical alchemy of great results.

Technology

some people.”

Perhaps, but who can afford to ignore these findings?
