One of the world's leading authorities on autism suggests a major shift in understanding autism and offers inspiring stories and practical advice drawn from his more than four-decade career.

Essential reading for any parent, teacher, therapist, or caregiver of a person with autism: a groundbreaking book on autism, by one of the world ' s leading experts, who portrays autism not as a tragic disability, but as a unique way of being human. Autism is usually portrayed as a checklist of deficits, including difficulties interacting socially, problems in communicating, sensory challenges, and repetitive behavior patterns. This perspective leads to therapies focused on ridding individuals of " autistic " symptoms. Now Dr. Barry M. Prizant, an internationally renowned autism expert, offers a new and compelling paradigm: the most successful approaches to autism don ' t aim at fixing a person by eliminating symptoms, but rather seeking to understand the individual ' s experience and what underlies the behavior. In Uniquely Human, Dr. Prizant suggests a major shift in understanding autism: Instead of classifying " autistic " behaviors as signs of pathology, he sees them as part of a range of strategies to cope with a world that feels chaotic and overwhelming. Rather than curb these behaviors, it ' s better to enhance abilities, build on strengths, and offer supports that will naturally lead to more desirable behavior and a better quality of life. In fact, argues Dr. Prizant, attempts to eliminate " autistic " behaviors may actually interfere with important developmental processes. While it never discounts the difficulties of living with autism, Uniquely Human offers inspiring stories, and practical advice drawn from Dr. Prizant ' s four-decade career working in universities, schools, hospitals, and in private practice. It conveys a deep respect for people with autism and the qualities that make them special. Filled with humanity and wisdom, Uniquely Human offers a compassionate and insightful perspective that parents, professionals, and family members will find uplifting and hopeful.

Being different from the masses is one of the greatest gifts that you possess! Let s face it: Who wants to be just like everyone else? Talk about boring! People come in all shapes and sizes and are born with natural and unnatural gifts and talents like no other, and your greatest challenge is to discover your gifts and then apply them to the world to create a better place, a better planet, a better universe! That is my challenge to you so that all of us can get along peacefully and become truly a population of one. I would like to ask you some questions to help you discover what makes you unique, different, and awesome. Are you different? Are you unique? Do you look different than others? Talk differently than others? Do you walk differently than others? Have you been born with talents that very few others have? Have you been brainwashed to look at your talents as a disability? Do you stay up nights dwelling on all the things in life you don t have, rather than focus on all the blessings you do have? Have you ever been bullied at school, at home, and in many areas in your life? Have you ever been called a retard, dumb, disabled ? If you have answered yes to any of these questions, perhaps you have yet to understand, accept, and apply your unique gifts to make the world a better place. If you have answered Yes to any of these questions, I feel your pain. I have walked in your shoes, and I can empathize with your situation. I have been bullied, called a retard, told that I am disabled, put in special classes, advised that I should not expect to reach my goals. My name is Tyler McNamee and I have been called ALL of the above many, many times in my life. I am nineteen years old and have been blessed with autism my entire life. I have chosen to accept my label of autism not as a disability but as an extraordinary ability and I want to help you overcome the label that you may have suffered from for many years of your life. So what is autism? The dictionary defines autism as a mental condition, present from early childhood, characterized by great difficulty in communicating and forming relationships with others. Also, it is defined as a mental condition in which fantasy dominates over reality. So just how many people today are affected by this condition? Let s put those numbers in perspective. A high school with 1,000 students enrolled is going to have 11 students with this condition, and a bigger high school with 2,500 students is going to have 28 students with autism. So, now that you know more about autism, let me highlight some of the things you will learn by reading this book since I want to assure you that this book is not just a book about autism it is a book about how we can all live together in harmony regardless of our differences. In this book, you are going to learn that, despite our differences and diversities, we can get along and become a population of one to serve others. It ' s time to say NO to trying to fit square-peg kids into rounds holes, and YES to raising them from a place of acceptance and joy. Today millions of kids are stuck in a world that doesn ' t embrace who they really are. They are the one in five " differently wired " children with ADHD, dyslexia, giftedness, autism, anxiety, or other neurodifferences, and their challenges are many. And for the parents who love them, the challenges are just as numerous, as they struggle to find the right school, the right support, the right path. But now there ' s hope. Differently Wired is a revolutionary book—weaving together personal stories and a tool kit of expert advice from author Deborah Reber, it ' s a how-to, a manifesto, and a reassuring companion for parents who can so often feel that they have no place to turn. At the heart of Differently Wired are 18 paradigm-shifting ideas—what the author calls " tilts, " which include how to accept and lean in to your role as a parent (#2: Get Out of Isolation and Connect). Deal with the challenges of parenting a differently wired child (#5: Parent from a Place of Possibility Instead of Fear). Support yourself (#11: Let Go of Your Impossible Expectations for Who You " Should " Be as a Parent). And seek community (#18: If It Doesn ' t Exist, Create It). Taken together, it ' s a lifesaving program to shift our thinking and actions in a way that not only improves the family dynamic, but also allows children to fully realize their best selves. " In this generous and urgent book, Deborah Reber lets the light in. She helps parents see that they ' re not alone, and even better, delivers a positive action plan that will change lives. " —Seth Godin, author of Linchpin " Differently Wired will help parents of children who think differently to accept their child for who they are and facilitate their successful development. " —Temple Grandin, author of Thinking in Pictures and The Autistic Brain
