How do you replace a legend? For Ducati, the Italian motorcycle manufacturer worshiped by racers and riders all over the world, the answer was to start from scratch. When the company decided to produce a successor to its immensely popular 916/996/998 series, it allowed designer Pierre Terblanche to create a completely new bike built from the inside out. This approach resulted in a radically styled motorcycle whose improved ergonomics offer greater comfort and control, with more agile handling at all speeds.Ducati also broke with tradition by allowing two of the worlds top motorcycling writers, Alan Cathcart and Marc Cook, to document the birth of the 999—from the earliest design ideas through final production. In an industry where product plans and manufacturing techniques are usually guarded like state secrets, Cathcart and Cook were given complete access to the designers, engineers, and technicians who worked to make the 999 a superbike sensation.
