The 2014 International Conference on E-Commerce, E-Business and E-Service (EEE 2014) was held on May 1-2, 2014, Hong Kong. This proceedings volume assembles papers from various professionals, leading researchers, engineers, scientists and students and presents innovative ideas and research results focused on the progress of E-Commerce, E-Business a

E-commerce and V-business examines the impact of the Internet and associated technologies on two related aspects of business: electronic commerce and virtual organization. Using a combination of recent theory and empirical evidence it demonstrates how forward thinking organizations are reaping considerable advantages from exciting new business models in these areas. Such models require radical rethinking of many aspects of traditional business. The book covers many of the critical and contemporary issues stemming from these important new developments. The collected papers in this book illustrate the wide variety of business opportunities afforded by e-commerce and virtual business. They describe and discuss the important issues that follow in the wake of an organization deciding to pursue consumers electronically and organize its operations virtually. It brings a good balance of theory and practical issues from different perspectives from different parts of the globe * Packed with new case studies and material illustrating how electronic commerce and virtual business have created significant strategic benefits *Emphasis on leading-edge technologies and applications * Examines both large and small organizations from around the globe

Aimed at students, this work covers various aspects of e-business - focusing on sales and marketing, as well as detailing procurement, supply chains, and the legal and security considerations. It contains a range of features to help you learn effectively including margin definitions, international case studies, activities and web links.

Introduction to E-commerce discusses the foundations and key aspects of E-commerce while focusing on the latest developments in the E-commerce industry. Practical case studies offer a useful reference for dealing with various issues in E-commerce such as latest applications, management techniques, or psychological methods. Dr. Zheng Qin is currently Director of the E-Commerce Institute of Xi'an Jiaotong University.

I3E 2001 is the first in a series of conferences on e-commerce, e-business, and- government organised by the three IFIP committees TC6, TC8, and TC11. It provides a forum, where users, engineers, and scientists from academia, industry, and government can present their latest findings in e-commerce, e-business, and-government applications and the underlying technology to support those applications. The conference comprises a main track and mini tracks dedicated to special topics. The papers presented in the main track were rigorously refereed and selected by the International Programme Committee of the conference. Thematically they were grouped in the following sessions: - Sessions on security and trust, comprising nine papers referring to both trust and security in general as well as presenting specific concepts for enhancing trust in the digital society. - Session on inter-organisational transactions, covering papers related to auditing of inter-organizational trade procedures, cross-organizational workflow and transactions in Business to Business platforms. - Session on virtual enterprises, encompassing papers describing innovative approaches for creating virtual enterprises as well as describing examples of virtual enterprises in specific industries. - Session on online communities containing three papers, which provide case studies of specific online communities and various concepts on how companies can build and harness the potential of online communities. - Sessions on strategies and business models with papers describing specific business models as well as general overviews of specific approaches for E- Strategy formulation.
