A new edition updated to meet the needs of the Pure Mathematics encountered in all the new specifications for single-subject A Level Mathematics. This major text is clearly set out with an excellent combination of clear examples and explanations, and plenty of practice material - ideal for supporting students who are working alone. The first two chapters are vital in preparing new students, particularly those with a Grade C at GCSE, for the rigours of A Level. Each chapter concludes with a selection of exam-style questions, giving students lots of practice for the real thing!

Experimentalists and theoreticians from chemistry and physics present various interactions in molecules using methods of chemical synthesis, structural analysis, spectroscopy and quantum chemical computations. This work constitutes an important basis in the investigation of increasingly more complex systems such as the study of the action of drugs in pharmaceutical research. The book gives an excellent survey for the specialist and also a welcome introduction for the advanced graduate student and the researcher in neighboring fields.

Revise for AS & A2 Biology with confidence! Providing complete study support throughout the two A Level years, this Edexcel Chemistry study guide matches the curriculum content and provides in-depth course coverage.
