Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and

Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

An interdisciplinary and quantitative account of human claims on the biosphere's stores of living matter, from prehistoric hunting to modern energy production. The biosphere--the Earth's thin layer of life--dates from nearly four billion years ago, when the

first simple organisms appeared. Many species have exerted enormous influence on the biosphere's character and productivity, but none has transformed the Earth in so many ways and on such a scale as Homo sapiens. In *Harvesting the Biosphere*, Vaclav Smil offers an interdisciplinary

and quantitative account of human claims on the biosphere's stores of living matter, from prehistory to the present day. Smil examines all harvests--from prehistoric man's hunting of megafauna to modern crop production--and all uses of harvested biomass, including energy, food, and

raw materials. Without harvesting of the biomass, Smil points out, there would be no story of human evolution and advancing civilization; but at the same time, the increasing extent and intensity of present-day biomass harvests are changing the very foundations of civilization's well-being.

File Type PDF Erfly Child Silvia Corradin Lulu Com

In his detailed and comprehensive account, Smil presents the best possible quantifications of past and current global losses in order to assess the evolution and extent of biomass harvests. Drawing on the latest work in disciplines ranging from anthropology to environmental

science, Smil offers a valuable long-term, planet-wide perspective on human-caused environmental change.

Yoshitoshi (1839-92) was the last great woodblock print master of the Ukiyo-e tradition, and 'One Hundred Aspects of the Moon' is regarded as

the city of Edo (Tokyo) shortly before Japan's violent transformations from a medieval to a modern society. He was keenly interested in preserving traditional Japanese culture against the inclusions of modernism, and his prints celebrate the glory of Japan in its mythology, literature, history, the

warrior culture, and fine woodblock print tradition. This book will appeal to a broad audience of connoisseurs as well as the many who cultivate an interest in Japanese art.
