Secondly, the stock engine cradle is designed around the stock Fiero rear track. Unfortunately, the project car is going to require an 8" track width increase. In my opinion, the best way to accomplish this is to widen the entire cradle. Otherwise I am going to require some very long rear control arms to reach the wider tracker on the rear wheels.

88 engine cradle swap into 86 - Pennock's Fiero Forum  
The difference is on the engine mount pad where the 88 engine mount location is shifted to the front and further inboard about 1" in both directions. Only the 60 degree V6 family uses the stock fiero 2.8 engine mount (and this mount is different between 85-87 and 88's). All other swaps use engine mounts specific to their engine family.

Pontiac fits 84-87 Fiero MADE IN USA (Fits: Pontiac Fiero)

Complete Engines for Pontiac Fiero for sale | eBay

These bushings are one of the best improvements that can be made to an 84-87 Fiero's handling! Six precision aluminum cradle mounts replace all four corners of the original rubber mounts and vastly improve handling without increasing ride harshness. Any movement of the engine cradle is simply too much. Don't waste time & money on urethane cradle mounts, only solid aluminum cradle mounts can eliminate performance robbing "cradle float" under cornering and hard acceleration.
