This volume brings together two comprehensive survey studies of the literature on the microeconomics of international trade. The chapters apply new empirical methods to the analysis of the links between international trade and various dimensions of firm performance such as productivity, profitability, wages, and survival. The studies also include report results for Germany, one of the leading actors on the world markets for goods and services. Contents: Survey Papers: Exports and Productivity: A Survey of the Evidence from Firm Level Data (Joachim Wagner) International Trade and Firm Performance: A Survey of Empirical Studies Since 2006 (Joachim Wagner) Characteristics of Exporting and Importing Firms in Germany: Exports and Firm Characteristics in German Manufacturing Industries: New Evidence from Representative Panel Data (Joachim Wagner) Higher Productivity in Importing German Manufacturing Firms: Self-Selection, Learning from Importing or Both? (Alexander Vogel and Joachim Wagner) Exports and Wages: Do Exporters Really Pay Higher Wages? First Evidence from German Linked Employer–Employee Data (Thorsten Schank, Claus Schnabel and Joachim

Wagner) Higher Wages in Exporting Firms: Self-Selection, Export Effect, or Both? First Evidence from Linked Employer–Employee Data (Thorsten Schank, Claus Schnabel and Joachim Wagner) International Trade and Profits: Exports and Profitability — First Evidence for German Manufacturing Firms (Helmut Fryges and Joachim Wagner) Exports and Profitability — First Evidence for German Business Services Enterprises (Alexander Vogel and Joachim Wagner) Exports, Imports and Profitability: First Evidence for Manufacturing Enterprises (Joachim Wagner) International Trade and Firm Survival: Exports, Imports and Firm Survival: First Evidence for Manufacturing Enterprises in Germany (Joachim Wagner) Risk or Resilience? The Role of Trade Integration and Foreign Ownership for the Survival of German Enterprises During the Crisis 2008–2010 (Joachim Wagner and John P. Weche Gelübcke) Credit Constraints and International Trade: Credit Constraints and Exports: A Survey of Empirical Studies Using Firm-Level Data (Joachim Wagner) Credit Constraints and Margins of Import: First Evidence for German Manufacturing Enterprises (Joachim Wagner) Extensive Margins of Exports and Imports: Trading Many Goods with Many Countries: Exporters and Importers from German Manufacturing Industries (Joachim Wagner) Methods of Empirical Analysis of Heterogeneous Exporters and Importers: From Estimation Results to Stylized Facts: Twelve Recommendations for Empirical Research in International Activities of Heterogeneous Firms (Joachim Wagner) Readership: Graduate students and researchers in the fields of econometrics and international economics.

International trade is the core foundation of globalisation. This current and up-to-date volume brings together the finest academics working in the field today, containing contributions in key areas of policy research, such as, modelling frameworks, trade policy, trade and migration, trade and the environment, trade and unemployment.

Despite their common roots, international economics (IE) and international business (IB) have developed into two distinct fields of study. Economists have directed their efforts at formalizing the workings of international trade and investment at the macroeconomic level; business scholars have relied more on data-driven conceptual narratives than mathematical tools. But the recent focus of IE literature on firm heterogeneity suggests that IE would benefit from IB analyses of the behavior and organization of the internationalizing firm. The contributions to this volume investigate ways that insights from IB can enrich IE research in firm heterogeneity. The contributors discuss firm-specific advantages in international trade and investment, considering the firm as the unit of analysis and managerial inputs as a variable in market entry decisions; analyze interactions between a firm and its external environment, including local corporate philanthropy and institutional settings; examine the boundaries of the firm and organizational choices such as the make-or-buy decision; and investigate technology transfer and innovation offshoring, discussing the role of subsidiaries, inventor employment, and other related topics. Although IE and IB look at international firms from different perspectives, these contributions make it clear that there is a potential for a productive exchange of insights and information between the two disciplines. Contributors: Laura Abramovsky, Carlo Altomonte, Sjoerd Beugelsdijk, Bruce Blonigen, Pamela Bombarda, Steven Brakman, Julia Darby, Rodolphe Desbordes, Filippo Di Mauro, María García-Vega, Harry Garretsen, Elena Huergo, Florian Mayneris, Quyen T. K. Nguyen, Verena Nowak, Cheyney O'Fallon, Gianmarco Ottaviano, Michael Pflüger, Filomena Pietrovito, Sandra Poncet, Alberto Franco Pozzolo, Alan M. The book provides theoretical and empirical evidence on how world trade evolves, how trade affects resource allocation, how trade competition affects productivity, how China shock affects world trade and how trade affects large and small countries. It is a useful reference which focuses on new approaches to international trade by looking into country-specific as well as firm-product level-specific cases. “ The Open Access version of this book, available at <http://www.taylorfrancis.com/books/10.4324/9781351061544>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. ”

Global Production is the first book to provide a fully comprehensive overview of the complicated issues facing multinational companies and their global sourcing strategies. Few international trade transactions today are based on the exchange of finished goods; rather, the majority of transactions are dominated by sales of individual components and intermediary services. Many firms organize global production around offshoring parts, components, and services to producers in distant countries, and contracts are drawn up specific to the parties and distinct legal systems involved. Pol Antràs examines the contractual frictions that arise in the international system of production and how these frictions influence the world economy. Antràs discusses the inevitable complications that develop in contract negotiation and execution. He provides a unified framework that sheds light on the factors helping global firms determine production locations and other organizational choices. Antràs also implements a series of systematic empirical tests, based on recent data from the U.S. Customs and Census Offices, which demonstrate the relevance of contractual factors in global production decisions. Using an integrated approach, Global Production is an excellent resource for researchers, graduate students, and advanced undergraduates interested in the inner workings of international economics and trade.

Before it was a fact of life, free trade was a much-debated issue in Canadian politics. The Free Trade Papers strips away the rhetoric and shows just what the key players--both American and Canadian--hoped to win and feared to lose under free trade. Duncan Cameron has identified the key documents expressing the views of both the boosters and critics of free trade, including private communications from President Reagan and U.S. trade ambassador Peter Murphy. Statements of dissent and some excellent political journalism are included in this volume, along with important research on the economic basis of free trade. The Free Trade Papers offers a vital, immediate primer of one of the most contentious debates in twentieth-century Canadian history.

The 2010 volume of Contemporary Issues in International Arbitration and Mediation - The Fordham Papers is a collection of important works in the field written by the speakers at the 2010 Fordham Law School Conference on International Arbitration and Mediation.
