Corruption is a threat to democracy and economic development in many societies. It arises in the ways people pursue, use and exchange wealth and power, and in the strength or weakness of the state, political and social institutions that sustain and restrain those processes. Differences in these factors, Michael Johnston argues, give rise to four major syndromes of corruption: Influence Markets, Elite Cartels, Oligarchs and Clans, and Official Moguls. In this 2005 book, Johnston uses statistical measures to identify societies in each group, and case studies to show that the expected syndromes do arise. Countries studied include the United States, Japan and Germany (Influence Markets); Italy, Korea and Botswana (Elite Cartels); Russia, the Philippines and Mexico (Oligarchs and Clans); and China, Kenya, and Indonesia (Official Moguls). A concluding chapter explores reform, emphasising the ways familiar measures should be applied - or withheld, lest they do harm - with an emphasis upon the value of 'deep democratisation'.

Are you ready to leave 2020 behind and start a new chapter in 2021 If so, there is good news: our God is a God of fresh starts.
