Television news range among the most extensively investigated topics in communication studies. The book contributes to television news research by focusing on whether and how news viewers who watch the same news program form similar or different interpretations. The author develops a novel concept of interpretation based on cognitive complexity research. He strongly argues that qualitative and quantitative research methods work best if they complement one another.

How can reading the Bible in its appropriate Mediterranean cultural context shed light on concerns of believers who live in Western or other cultures? In *Cultural Tools for Interpreting the Good News*, John J. Pilch presents a basic introduction to the ancient Middle Eastern culture in which the Bible originated. A brief review of the life of Jesus from birth to death and resurrection guides the selection of biblical text segments to illustrate key cultural concepts so that believers may appropriate the Bible for personal or community life. Chapter one examines the core Middle Eastern cultural concepts honor and shame as they are reflected in the stories about Jesus' origins and his behavior in adulthood. Chapter two describes how Jesus grew up to become a typical and successful male in his culture. Chapter three presents Jesus as a Holy Man in his tradition who announces the reign of God especially in parables. Chapter four shows how Jesus sought to establish the reign of God especially in his healing activities and by offering fresh insights into the appearances of the Risen Jesus. Chapters are Honor and Shame," "How a Mediterranean Boy Becomes a Man, - "Jesus Announces the Reign of God, - "Jesus Seeks to Establish the Reign of God. - John J. Pilch, PhD, teaches Scripture at Georgetown University as well as at the University of Pretoria. The Routledge Handbook of Interpreting is an essential reference for researchers and advanced students of interpreting.

This volume contains selected papers from the 4th Language International Conference on 'Teaching Translation and Interpreting: Building Bridges' which was held in Shanghai in December 1998. The collection is an excellent source of ideas and information for teachers and students alike. With contributions from five continents, the topics discussed cover a wide range, including the relevance of translation theories, cultural and technical knowledge acquisition, literary translation, translation and interpreting for the media, internet-related training methods, and tools for student assessment. While complementing the volumes of the previous three conferences in exploring new methods and frontiers, this collection is particularly strong on case studies outside of the European and Anglo-American spheres.

This book presents a collection of state-of-the-art work in corpus-based interpreting studies, highlighting international research on the properties of interpreted speech, based on naturalistic interpreting data. Interpreting research has long been hampered by the lack of naturalistic data that would allow researchers to make empirically valid generalizations about interpreting. The researchers who present their work here have played a pioneering role in the compilation of interpreting data and in the exploitation of that data. The collection focuses on both of these aspects, including a detailed overview of interpreting corpora, a collective paper on the way forward in corpus compilation and several studies on interpreted speech in diverse language pairs and interpreter-mediated settings, based on existing corpora.

"This book examines the role of translation in news making, taking Arabic satellite television as its case study, and presents a framework for journalists, translators, news editors and other media workers to help them avoid the pitfalls of translation mediation."--P. [4] of cover.
