their intrinsic properties such as absolute mass scale and CP properties are unknown. The open question of the absolute neutrino mass scale will be addressed with unprecedented accuracy by the Karlsruhe Tritium Neutrino (KATRIN) experiment, currently under construction. This thesis focusses on the

importantly, however, it
was possible to reduce

obstacles and challenges in measuring the absolute mass scale of neutrinos can be met successfully if novel experimental tools (ECR) and novel computing methods (KASSIOPEIA) are combined to allow almost background-free tritium β -spectroscopy.

Congo-Zaire contains

Africa's largest remaining tracts of intact rain forest, making it one of the most important regions for biodiversity conservation. Its Ituri Forest is home to plants and animals native to nowhere else on earth, including the elusive and little-known okapi. In this popularly written book, three long-time

observers of the okapi present a complete, contemporary natural history of this appealing relative of the giraffe.

They recount its discovery by European explorers and describe its appearance and life cycle. They also discuss current efforts to preserve the species, both in the wild and at zoos around the world.
