"The New York Times and USA Today bestselling series soars to even greater heights with a new prophecy and five new dragonets ready to claim their destiny! Peril has been loyal to Queen Scarlet, who used her fatal firescales to kill countless dragons in the SkyWing arena. Now, Peril is loyal to Clay, the only dragonet who has ever been her friend. So when Scarlet threatens Jade Mountain Academy, Peril sets off to find her former queen, stop her, and save the day, no matter what it takes. There's just one problem: a strangely persistent SeaWing, Turtle, insists on coming along, too. Turtle is worried about his friends, who left to search for Scarlet and haven't returned. Peril is worried that she might accidentally burn Turtle -- or burn him on purpose, for being so annoying -- and frustrated that she keeps saying and doing the wrong things. She can't escape her firescales, and she can't escape her reputation as the deadliest dragon in Pyrrhia. So when she's offered a chance to trade everything for a second chance, Peril has to decide who she's really loyal to . . . and whether her own scales might actually be worth saving."

The Katy Trail is a 225-mile long biking trail from Clinton to St. Charles, Missouri. It is just the place for Samuel to get away from it all, to heal, and to quell some of the demons from his past. Into his life, however, drops Misty, a mysterious woman with amnesia, who is being chased by a shotgun-toting man intent on killing her. Thus begins one of the wildest bicycle rides in history.

A brilliant and visionary argument for America's role as an enforcer of peace and order throughout the world--and what is likely to happen if we withdraw and focus our attention inward. Recent years have brought deeply disturbing developments around the globe. American sentiment seems to be leaning increasingly toward withdrawal in the face of such disarray. In this powerful, urgent essay, Robert Kagan elucidates the reasons why American withdrawal would be the worst possible response, based as it is on a fundamental and dangerous misreading of the world. Like a jungle that keeps growing back after being cut down, the world has always been full of dangerous actors who, left unchecked, possess the desire and ability to make things worse. Kagan makes clear how the "realist" impulse to recognize our limitations and focus on our failures misunderstands the essential role America has played for decades in keeping the world's worst instability in check. A true realism, he argues, is based on the understanding that the historical norm has always been toward chaos--that the jungle will grow back, if we let it.

Historian Theodore White called it "the most dangerous, terrifying, barbarous aerial transport run in the world â € the skyway to Hell." Life Magazine called it " the most dangerous non-combat flying in the war, the world's worst weather over the world's highest mountains. " Both of these statements are referring to the Hump, which was a perilous 500-mile flight path across the eastern Himalayan Mountains many U.S. pilots flew during World War II in order to keep the Allies well-supplied in China. Between 1943 and 1945, about 3,000 pilots went down in the Hump. Only about 1,200 made it back to safety. This narrative nonfiction title recounts the many dangers pilots faced on their missions, including ice storms, high winds, narrow mountain passageways, and attacks by Japanese Zeroes. It also recounts the equally daring rescue attempts to save these pilots, many of which were made by the Indo-China Division of Search and Rescue. Using personal accounts from pilots, rescuers, and U.S. Air Force staff, this fast-paced narrative puts young readers in the cockpit alongside some of the war's bravest pilots.
