Find your device to get support for your specific model, including step-by-step instructions, interactive simulators, videos and more.

Originally published in 1926, this book by the renowned British meteorologist Napier Shaw focuses on the history of meteorology.

The latest edition of this introductory benchtop manual is up-to-date, affordable, and easy-to-follow. This text is perfect for your two-quarter or one semester course in Recombinant DNA Techniques and is specifically designed to lead your student or technician, who is a newcomer to molecular biology, from the basic skills of growing and maintaining bacterial colonies through plasmid DNA isolation, cloning, DNA sequencing, and hybrid detection. Comb-bound, three-column, large 9-1/4" x 7-1/2" format Exercises contain explanatory material and margin notes that pinpoint critical steps and important concepts Necessary reagents and equipment are presented in a checklist at the beginning of each protocol Techniques for bacteria are complemented with those for *Drosophila* Each experiment has been tested in the laboratory by students for five years Features a complete chapter on computers in the molecular biology laboratory Presents helpful appendixes on safety in the laboratory, frequently used ancillary techniques, and recipes for buffers, media, and strains

This volume presents detailed descriptions of methods for evaluating, monitoring and assessing bioremediation of soil contaminated with organic pollutants or heavy metals. Traditional soil investigation techniques, including chemical, physical and microbiological methods, are complemented by the most suitable modern methods, including bioreporter technology, immunological, ecotoxicological and molecular assays. Step-by-step procedures, lists of required equipment and reagents and notes on evaluation and quality control allow immediate application
