Through a set of case studies, a team of international scholars analyze the emerging power of the lantern show in the nineteenth and twentieth centuries within politics, religion, travel, science, health, marketing and entertainment.

Before the Movies is the first book about American screen entertainment in the pre-movie era. A groundbreaking study, lavishly illustrated with 330 color pictures, it is a comprehensive survey of the American artists who created early magic-lantern stories and songs for the screen. The book emphasizes the work of Joseph Boggs Beale, a pioneer in the field and demonstrates that Beale almost single-handedly created American-made screen entertainment for the generation before the movies. His lifetime output was 2,073 images in 258 sets – the screen-time equivalent of 14 full-length films – which millions enjoyed every year. The provenance, attribution, and dates of Beale's lantern slides are discussed in detail, and a comprehensive catalog of his lantern images makes Before the Movies an essential reference volume.
