The new edition of Clinical Manual of Psychopharmacology in the Medically Ill continues the legacy and builds on the success of the first edition by offering a thoroughly up-to-date, comprehensive, and practical guide to the prescription of psychotropic medications in patients with medical illness. The book addresses the prevalence of psychiatric illness in patients with serious medical illness, the complications that may arise, and the implications for psychopharmacological treatment. There is increasing recognition that patients with medical and psychiatric comorbidity have more functional impairment, disability days, emergency department use, rehospitalization, and other medical care costs than do those without such comorbidity. As a result, health care systems have been incentivized to develop new and innovative models of population-based care that integrate medical and psychiatric care in an effort to increase quality and prevention while decreasing use of expensive services such as emergency department visits and hospitalizations. The book is a valuable guide for clinicians across a range of specialties operating in this new, more demanding health care environment. The manual addresses critically important topics through the use of a variety of user-friendly features: Psychiatric drugs that have become available since the first edition, as well as all

During the period of industrialisation in Japan from the 1870s to the 1930s, the textile industry was Japan's largest manufacturing industry, and the

country's major source of export earnings. It had a predominantly female labour force, drawn mainly from the agricultural population. This book examines the institutions of the labour market of this critical industry during this important period for Japanese economic development. Based on extensive original research, the book provides a wealth of detail, showing amongst other things the complexity of the labour market, the interdependence of the agricultural and manufacturing sectors, and the importance of gender. It argues that the labour market institutions which developed in this period had a profound effect on the labour market and labour relations in the postwar years.
