Candidates for this course are recommended to attend the following:- 1- A course for carbonate reservoir characterization due its sever heterogeneity. 2- Surface geological field trips for carbonate exposures. 3- To visit sites of recent carbonate (reefs) preferably by a sub marine glass boat to observe the variation in reef distribution and growth within the same locality.

This book explores the phenomenon of Independence Days. These rituals had complex meanings both in the territories concerned and in Britain as the imperial metropole, where they were extensively reported in the press. The text is concerned with the political management, associated rhetoric and iconography of these seminal celebrations. The focus is therefore very much on political culture in a broad sense, and changing perceptions and presentations over time. Highlights of the book include an overview by David Cannadine relating the topic to ornamentalism, invented tradition and transitions in British culture. Although the book is mainly concerned with the British Empire, Martin Shipway -- a leading historian and cultural analyst of French decolonization -- contributes an acute summary of how the same 'moment' was handled differently in the other great European empires. There are detailed and lively studies by noted specialists of the immediate coming of Independence to India/Pakistan, Malaya, Ghana, Zimbabwe, and Guyana. The book includes a thematic focus on the important role of representatives of the British monarchy in legitimating transfers of sovereignty at their point of climax. This book was published as a special issue of The Round Table.

The social sciences have been heavily influenced by modernization theory, focusing on issues of economic growth, political development and social change, in order to develop a predictive model of linear progress for developing countries following a Western prototype. Under this hegemonic paradigm of development the world tends to get divided into simplistic binary oppositions between the 'West' and the 'rest', 'us' and 'them' and 'self' and 'other'. Proposing to shift the discussion on what constitutes the 'Other' as opposed to the 'Self' from philosophy and cultural studies to the social sciences, this book explores how the structural asymmetries existing between Western discourses and the realities of the non-Western world manifest themselves in the ideas, institutions and socio-political practices of India and China, and in how far they shape the social scientist's understanding of their discipline in general. It provides a counter-narrative by revealing the relativity of geographies, and by showing that the conventional presentation of core elements of the Asian socio-political set-up as 'aberrations' from the Western models fails to acknowledge their inherent strategic character of adapting Western concepts to meet local requirements. Drawing on multiple disciplines, concepts and contexts in India and China, the book makes a valuable contribution to the theory and practice of politics, as well as to International and Asian Studies.
