Contains thirteen essays published by Barry Stroud between 1965 and 2000 on central topics in the philosophy of language and epistemology.

Philosophy (especially philosophy of language and philosophy of mind), science (especially linguistics and cognitive science), and common sense all sometimes make reference to propositions;understood as the things we believe and say, and the things which are (primarily) true or false. There is, however, no widespread agreement about what sorts of things these entities are. In New Thinking about Propositions, Jeffrey C. King, Scott Soames, and Jeff Speaks argue that commitment to propositions is indispensable, and that traditional accounts of propositions are inadequate. They each then defend their own views of the nature of propositions.

A collection of essays which critically evaluate the writings of Quine.

This book surveys several theoretical controversies in anthropology that revolve around reconciling the objective description of culture with the influence of inquirer interests and conceptions. It relates them to discussions by followers of W.V. Quine who see the problems of anthropological inquiry as indicative of conceptual problems in the basic assumptions operative in the discipline, and in the study of language in general. Feleppa offers a revised view of the nature and function of translation in anthropology that gives a plausible account of the problems that traditional semantics introduces into anthropology, while avoiding the severe methodological import Quine envisions.

This book sets out the principles of engineering practice, knowledge that has come to light through more than a decade of research by the author and his students studying engineers at work. Until now, this knowledge has been almost entirely unwritten, passed on invisibly from one generation of engineers to the next, what engineers refer to asexpe
