"Vigor is one of the finest boating writers of our time." Cruising World Boating encompasses an impressive array of disciplines, and every sailor or powerboater worth his or her salt is, by turns, a seaman, navigator, mechanic, electrician, painter, carpenter, meteorologist, medic, cook, and even, on occasion, a diplomat. Which is why it is so surprising that, until now, there has been no single-source reference to which a mariner could turn for practical, up-to-date information in all these areas. The Practical Encyclopedia of Boating is the first guide to all practical and many theoretical aspects of recreational boating under sail and power. From seamanship to maintenance, navigation to boat design and construction, nautical lore and esoterica to the science of how things work, this handy reference gives sailors and powerboaters quick access to just the right amount of information needed to answer most questions and solve most problems.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
