Briefly traces the history of the Armenian people, looks at their art and architecture, and discusses their social structure, religion, language, and culture

Giambattista Vico (1668-1744) is often regarded as the beleaguered, neglected genius of pre-Enlightenment Naples. His work-though known to Herder, Coleridge, Matthew Arnold, and Michelet-widely and deeply appreciated only during the twentieth century. Although Vico may be best known for the use James Joyce made of his theories in *Finnegans Wake*, Croce's insightful analysis of Vico's ideas played a large role in alerting readers to his unique voice. Croce's volume preceded Joyce's creation of "Mr. John Baptistser Vickar" by

a quarter century. During the last 25 years Vico's ideas about history, language, anti-Cartesian epistemology, and rhetoric have begun to receive the recognition their admirers have long claimed they deserve. Increasing numbers of publications appear annually which bear the stamp of Vico's thinking. Even if he is not yet so renowned as some of his contemporaries, such as Locke, Voltaire, or Montesquieu, there are good reasons to believe that in the future he will be equally honored as a cultural theorist. As a theorist of historical process and its language, there is no more innovative voice than his until the twentieth century-which explains in part why such figures as Joyce and R.G. Collingwood freely drew on Vico's work, particularly his *New Science*, while creating their own. If Vico was Naples' most brilliant, if uncelebrated, citizen prior to the Enlightenment taking hold in

Southern Italy, then Croce (1866-1952) is surely the city's most important thinker of modern times, and the single indispensable Italian philosopher since Vico's death.

When a genius of Croce's interpretative prowess, evaluates the work of another, it is inevitable that an explosive mixture will result. A great virtue of this book is its fusion of Croce's unique brand of idealism and aesthetic philosophy with Vico's epistemological, ethical, and historical theories. If Vico's theory of cyclical changes in history, the *corsi e ricorsi*, remains fruitful, it might be argued that Croce's evaluation of his countryman's ideas represented the next turn of the philosophical wheel toward enlightenment.

transfers, transplants and receptions of law. What are the conceptual tools and methods that legal historians are employing to understand these processes?

Teaching and learning in a college setting has never been more challenging. How can instructors reach out to their students and fully engage them in the conversation? Applicable to multiple disciplines, the Decoding the Disciplines Paradigm offers a radically new model for helping students respond to the challenges of college and provides a framework for understanding why students find academic life so arduous. Teachers can help their pupils overcome obstacles by identifying bottlenecks to learning and systematically exploring the steps needed to overcome these obstacles. Often, experts find it

difficult to define the mental operations necessary to master their discipline because they have become so automatic that they are invisible. However, once these mental operations have been made explicit, the teacher can model them for students, create opportunities for practice and feedback, manage additional emotional obstacles, assess results, and share what has been learned with others.

Writing Material Culture History examines the methodologies currently used in the historical study of material culture. Touching on archaeology, anthropology, art history and literary studies, the book provides history students with a fundamental understanding of the relationship between artefacts and historical narratives. The role of museums,

the impact of the digital age and the representations of objects in public history are just some of the issues addressed in a book that brings together distinguished scholars from around the world. This new edition includes:

- \* A new wide-ranging introduction highlighting the role of material culture in the modern period and presenting recent contributions to the field.
- \* A more balanced and easy-to-use structure, including 9 methodological chapters and 20 'object in focus' chapters consisting of case studies for classroom discussion.
- \* 5 fresh 'object in focus' chapters showing greater engagement with 20th-century material culture, non-European artefacts (particularly in relation to issues of power, indigeneity and repatriation of objects), architecture (with pieces on industrial heritage in Europe and on heritage destruction in China) and the definitions and limits of material culture as

a discipline. \* Expanded online resources to help students navigate the museums/institutions holding key artefacts. \* Historiographical updates and revisions throughout the text. Focusing on the global dimension of material culture and bridging the gap between the early modern and modern periods, *Writing Material Culture History* is an essential tool for helping students understand the potential of objects to re-cast established historical narratives in new and exciting ways.

The *Global Lives of Things* considers the ways in which ‘things’, ranging from commodities to works of art and precious materials, participated in the shaping of global connections in the period 1400-1800. By focusing on the material exchange between Asia, Europe, the Americas and Australia, this volume traces

the movements of objects through human networks of commerce, colonialism and consumption. It argues that material objects mediated between the forces of global economic exchange and the constantly changing identities of individuals, as they were drawn into global circuits. It proposes a reconceptualization of early modern global history in the light of its material culture by asking the question: what can we learn about the early modern world by studying its objects? This exciting new collection draws together the latest scholarship in the study of material culture and offers students a critique and explanation of the notion of commodity and a reinterpretation of the meaning of exchange. It engages with the concepts of 'proto-globalization', 'the first global age' and 'commodities/consumption'. Divided into three parts, the volume

considers in Part One, Objects of Global Knowledge, in Part Two, Objects of Global Connections, and finally, in Part Three, Objects of Global Consumption. The collection concludes with afterwords from three of the leading historians in the field, Maxine Berg, Suraiya Faroqhi and Paula Findlen, who offer their critical view of the methodologies and themes considered in the book and place its arguments within the wider field of scholarship. Extensively illustrated, and with chapters examining case studies from Northern Europe to China and Australia, this book will be essential reading for students of global history.
