pipes and joints.

"This manual provides the user with both general and technical information to aid in design, procurement, installation, and maintenance of PVC pipe and fittings. This manual presents a discussion of recommended practices"--

Roadwork: Theory and Practice, now in its sixth edition, gives the essential information needed by every road worker, highway technician, incorporated, graduate or chartered engineer, not only by explaining the theory of road construction and its associated activities, but by illustrating its application with practical working methods that are in use in everyday engineering practice. As such, it successfully bridges the gap so often found between civil engineering theory and the day-to-day work of a highways engineer. The authors have drawn from a lifetime of experience in the construction industry and included current design and construction practices.

Starting in the 1950s, Americans eagerly built the planet's largest public work: the 42,795-mile National System of Interstate and Defense Highways. Before the concrete was dry on the new roads, however, a specter began haunting them—the highway killer. He went by many names: the "Hitcher," the "Freeway Killer," the "Killer on the Road," the "I-5 Strangler," and the "Beltway Sniper." Some of these criminals were imagined, but many were real. The nation's murder rate shot up as its expressways were built. America became more violent and more mobile at the same time. Killer on the Road tells the entwined stories of America's highways and its highway killers. There's the hot-rodding juvenile delinquent who led the National Guard on a multistate manhunt; the wannabe highway patrolman who murdered hitchhiking coeds; the record promoter who preyed on "ghetto kids" in a city reshaped by freeways; the nondescript married man who stalked the interstates seeking women with car trouble; and the trucker who delivered death with his cargo. Thudding away behind these grisly crime sprees is the story of the interstates—how they were sold, how they were built, how they reshaped the nation, and how we came to equate them with violence. Through the stories of highway killers, we see how the "killer on the road," like the train robber, the gangster, and the mobster, entered the cast of American outlaws, and how the freeway—conceived as a road to utopia—came to be feared as a highway to hell.

Spon's Landscape and External Works Price Book 2004 offers the only comprehensive source of information for detailed external works and landscape costs. It covers all the items to be found in hard and soft landscape contracts and is therefore an indispensable reference book for quantity surveyors, landscape architects and contractors - essential fo

Manhours, labor and material costs for all common plumbing and HVAC work in residential, commercial, and industrial buildings. You can quickly work up a reliable estimate based on the pipe, fittings and equipment required. Every plumbing and HVAC estimator can use the cost estimates in this practical manual. Sample estimating and bidding forms and contracts also included. Explains how to handle change orders, letters of intent, and warranties. Describes the right way to process submittals, deal with suppliers and subcontract specialty work. Included in this edition: costs for ASME "H" or "U" stamped, LFUE certified 90% or better green certified boilers, costs for emission sensing and recording equipment for boilers, costs for self-contained roof-top DX air conditioning units, costs for heat recovery ventilators, roof exhaust fans, makeup air units, ventilation exhausters, energy-efficient exhauster arrays, air balance software, LEED certified boilers, residential heat pumps, LEED ce

Spon's Landscape and External Works Price Book 2004 offers the only comprehensive source of information for detailed external works and landscape costs. It covers all the items to be found in hard and soft landscape contracts and is therefore an indispensable reference book for quantity surveyors, landscape architects and contractors - essential for compiling estimates, specifications, bills of quantities and works schedules. A full index and list of manufacturers and suppliers gives easy reference to all items. The L and E comes with a 'free' CDROM that enables the reader to view the entire book on screen, cut and paste prices into other tender documents, export to other major packages, perform simple calculations, index search, produce estimate and tender documents, adjust rates and data. This complete package means that Spon's Landscape and External Works Price Book 2004 is now better than ever and is a resource that no building firm, surveyor or architect should be without. New features for the easier-to-read 2004 edition include: information on, and incorporating, the new CIJC three year age agreement, effective from Monday 30th June 2003; additional plant items to reflect the increased mechanisation of site handling of materials; new paving and kerb items; additional measured rate items for work in small gardens; non-rigid constructions, pumps and rocks associated with water features.

Provides practical information about the design and installation of ductile iron pressure piping systems for water utilities. The 12 chapters outlines the procedure for calculating pipe wall thickness and class, and describes the types of joints, fittings, valves, linings, and corrosion protection a
