Better Governance Across the Board is a practical guide for achieving good corporate governance of organizations regardless of whether they are for profit, listed, state-owned, family owned, or widely held. It delves into the questions boards must ask if they are to fulfill their fiduciary duties, taking account of regulatory issues. Part 1 defines corporate governance, explaining the four reasons why it matters and how it applies to a wide range of organizations. Part 2 explores the "Five P" framework of Purpose, Principles, Power, People, and Processes that helps boards to create sustainable value. Part 3 concludes by showing how the organization ' s long-term "license to operate" is achieved by boards focusing on the three most important assets of the organization: its reputation; its people, and its processes. This book explores the dilemmas that currently exist in modern approaches to corporate governance and suggests ways of overcoming them. Based on ten years of teaching more than 1,500 directors of publicly listed companies, it integrates key principles of leadership, ethics, branding, and governance into a unique five-factor framework to help directors make good decisions in strategy, risk management, succession planning, internal controls, and stakeholder engagement.

The business environment is changing more rapidly than ever before, and new business ideas are emerging. This book discusses applying insights from design thinking to craft novel strategies that satisfy customer needs, make use of the available capabilities, integrate requirements for financial success and provide competitive advantage. It guides readers through the jungle encountered when developing a strategy for sustained growth and profitability. It addresses strategy design in a holistic way by applying abductive reasoning, iteratively observing customers and focusing on empathy, as well as prototyping ideas and using customers to validate them. Uniquely applying insights from design thinking to strategy, this book is a must-read for graduates, MBAs and executives interested in innovation and strategy, as well as corporate strategists, innovation managers, business analysts and consultants.

Aiming to bridge the gap between theory and application, this work focuses on strategic management.

This book presents the latest research on the area of nano-energetic materials, their synthesis, fabrication, patterning, application and integration with various MEMS systems and platforms. Keeping in mind the applications for this field in aerospace and defense sectors, the articles in this volume contain contributions by leading researchers in the field, who discuss the current challenges and future perspectives. This volume will be of use to researchers working on various applications of high-energy research.

The best way to select emerging markets to exploit is to evaluate their size or growth potential, right? Not according to Krishna Palepu and Tarun Khanna. In Winning in Emerging Markets, these leading scholars on the subject present a decidedly different framework for making this crucial choice. The authors argue that the primary exploitable characteristic of emerging markets is the lack of institutions (credit-card systems, intellectual-property adjudication, data research firms) that facilitate efficient business operations. While such "institutional voids" present challenges, they also provide major opportunities-for multinationals and local contenders. Palepu and Khanna provide a playbook for assessing emerging markets' potential and for crafting strategies for succeeding in those markets. They explain how to: - Spot institutional voids in developing economies, including in product, labor, and capital markets, as well as social and political systems - Identify opportunities to fill those voids; for example, by building or improving market institutions yourself - Exploit those opportunities through a rigorous five-phase process, including studying the market over time and acquiring new capabilities Packed with vivid examples and practical toolkits, Winning in Emerging Markets is a crucial resource for any company seeking to define and execute business strategy in developing economies.

This book discusses different aspects of energy consumption and environmental pollution, describing in detail the various pollutants resulting from the utilization of natural resources and their control techniques. It discusses diagnostic techniques in a simple and easy-to-understand manner. It will be useful for engineers, agriculturists, environmentalists, ecologists and policy makers involved in area of pollutants from energy, environmental safety, and health sectors.

This book proposes that organizational policies are what ensure the institutionalization and sustainability of futures thinking in organizations. It presents several case studies from corporations and other institutions that describe effective use of foresight methods and internal policies to respond to rapid change. The case studies address changing trends in technology, globalization and/or workforce diversity, and the impact on the economic and political well-being of the organization. The editors also develop an organizational capability maturity model for futures thinking as well as providing questions for discussion that promote critical review of each case chapter. This book will inform scholars and organizational leaders how best to utilize foresight methodologies and organizational policies to sustain successful management strategies within futures thinking organizations. Chapter 9 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

The Mishna Berura is, without a doubt, Rabbi Israel Meir Kagan's greatest and most complex contribution to the canon of Orthodox Jewish Law; it is a singular work that synthesizes Jewish traditions, laws, and mores into a practical halakhic guide to daily religious life. For all of his traditionalism, Rabbi Kagan was an iconoclast, and the Mishna Berura broke from many of the traditional approaches of deciding halakhic directives. Instead, he favored studying, engaging, and asserting decisions in a nuanced, almost natural approach to how ethical people should live their daily lives consistent with Jewish law. Today, the Mishna Berura has gained widespread recognition and is considered authoritative by essentially all of contemporary Orthodox Jewry, a measure of greatness that few works of Halakha have attained. Michael J. Broyde and Ira Bedzow here investigate this seminal text and explore its background and decision-making process.

This package includes a physical copy of Exploring Strategy text only 10th edition as well as access to the eText and MyStrategyLab. With over one million copies sold worldwide, Exploring Strategy has long been the essential introduction to strategy for the managers of today and tomorrow. From entrepreneurial start-ups to multinationals, charities to government agencies, this book raises the big questions about organisations - how they grow, how they innovate and how they change. With two new members added to the renowned author team, this tenth edition of Exploring Strategy has been comprehensively updated to help you: - Understand clearly the key concepts and tools of strategic management - Explore hot topics, including internationalisation, corporate governance, innovation and entrepreneurship - Learn from case studies on world-famous organisations such as Apple, H&M, Ryanair and Manchester United FC.

This book contains all refereed papers that were accepted to the third edition of the « Complex Systems Design & Management » (CSD&M 2012) international conference that took place in Paris (France) from December 12-14, 2012. (Website: <http://www.csdm2012.csdm.fr>) These proceedings cover the most recent trends in the emerging field of complex systems sciences & practices from an industrial and academic perspective, including the main industrial domains (transport, defense & security, electronics, energy & environment, e-services), scientific & technical topics (systems fundamentals, systems architecture& engineering, systems metrics & quality, systemic tools) and system types (transportation systems, embedded systems, software & information systems, systems of systems, artificial ecosystems). The CSD&M 2012 conference is organized under the guidance of the CESAMES non-profit organization (<http://www.cesames.net>).
