Nonverbal Communication in Human Interaction ...

The current volume, featuring 28 contributions from cutting-edge researchers, emphasizes uses, purposes, origins, and consequences of nonverbal communication in the lives of individuals, dyads, and groups - in other words, the behaviour of human beings. As such, the volume as a whole is not just about communication systems per se nor the impact on humans of the physical environment, whether built or natural. Instead, the volume focuses on humans engaging in nonverbal communication and the communicative and psychological aspects of this behaviour. Nonverbal behaviour is an inclusive category and includes all emitted nonverbal behaviour that may be subject to interpretation by others, whether the behaviour is intentionally produced or not. This panoramic volume, edited by two of the world's leading authorities on nonverbal communication, contains 28 essays presenting the state of the art in the domain of nonverbal behaviour study. The most comprehensive, most readable compendium of research and theory on nonverbal communication available, NONVERBAL COMMUNICATION IN HUMAN INTERACTION (WITH INFOTRAC) uses the cross-disciplinary approaches of speech and social psychology to focus on how nonverbal communication research affects a wide variety of academic interests. Your purchase includes access to InfoTrac College Edition, an online university library of full length articles from academic journals, magazines and newspapers.

Nine years after the First Edition, key scholars redefine the field of interpersonal communication. New chapters, which represent areas of contemporary concern, focus on culture and meaning, supportive communication and health care.

The Handbook of Communication Skills is recognised as one of the core texts in the field of communication, offering a state-of-the-art overview of this rapidly evolving field of study. This comprehensively revised and updated fourth edition arrives at a time when the realm of interpersonal communication has attracted immense attention. Recent research showing the potency of communication skills for success in many walks of life has stimulated considerable interest in this area, both from academic researchers, and from practitioners whose day-to-day work is so dependent on effective social skills. Covering topics such as non-verbal behaviour, listening, negotiation and persuasion, the book situates communication in a range of different contexts, from interacting in groups to the counselling interview. Based on the core tenet that interpersonal communication can be conceptualised as a form of skilled activity, and including new chapters on cognitive behavioural therapy and coaching and mentoring, this new edition also places communication in context with advances in digital technology. The Handbook of Communication Skills represents the most significant single contribution to the literature in this domain. Providing a rich mine of information for the neophyte and practising professional, it is perfect for use in a variety of contexts, from theoretical mainstream communication modules on degree programmes to vocational courses in health, business and education. With contributions from an internationally renowned range of scholars, this is the definitive text for students, researchers and professionals alike.

This book offers a comprehensive overview of the latest developments in the social psychology of nonverbal communication. It explores topics including social skill, empathy, adaptive advantage, emotion-reading and emotion-hiding; and examines personal charisma, memory and communicating with robots. Together, the authors present diverse, cutting-edge research on nonverbal social intelligence as an adaptive strategy for survival and success. The collection provides an effective demonstration of the interdisciplinary nature of this topic, and it's relevance to researchers across the social sciences and beyond.
