Zimbabwe has cast a powerful regional and international shadow since it became independent in 1980 and more recently, through the crises of the first decade of the twenty-first century. The 2000s were a decade of combined political, economic and social crises in Zimbabwe following what had been a relatively successful twenty years of independence since 1980. The scale, depth and severity of the crises evolving since 2000 have been as dramatic as they have been unexpected. While there has been substantial coverage of the internal consequences of Zimbabwe's crises less attention has been paid to its regional and cross-border consequences. In explaining the ongoing processes stemming from the crises, this book looks at three neighboring countries - Mozambique, South Africa and Zambia - to depict how, over time, they have experienced and interpreted events in Zimbabwe, how they have dealt with Zimbabweans entering their territories, and how they have or have not formulated policies and developed practices to cope with the arrival of new and mainly undocumented Zimbabwean immigrants.

Are you a parent or guardian looking for a top-notch 21st-century private school in Zambia, one that will meet your family needs and expectations? This profound question is at the core of this first-ever book on private school education in Zambia. Choosing a Good Private School for your Child: The Ultimate Guide for Parents and Guardians in Zambia emerged from Monde Nyambe's vast experience working as an educator and school leader in private international school settings. The book provides insights into pertinent factors that assist parents as they make important decisions about private school choices for their children. Through research and experience, the author draws on the views of key stakeholders to create a decision-making tool on choosing a good private school, ideal not only for parents but also for teachers, school leaders and private school proprietors. Make no mistake, this is a must-read for parents intending to give their children a solid head start by ensuring that they secure a good private school amidst the ever-rising number of private schools in Zambia.

"The paper analyzes migration from Zambia in order to understand how migration policy can support development in the least developed countries. Overall emigration from Zambia is not high by regional standards, but the pattern of migration is skewed toward the skilled and away from the unskilled. A development-friendly approach to migration for Zambia would strive to ensure the temporariness of both types of movement. First, industrial countries may be willing to accept a higher level of unskilled immigration if they could be certain that it is temporary. Second, any adverse effects of brain drain would be greatly alleviated if skilled emigration is temporary. The problem is that host countries cannot unilaterally ensure temporariness of unskilled migration because repatriation cannot be accomplished without the help of source countries like Zambia, and source countries today have little incentive to facilitate the return of the unskilled. At the same time, source countries like Zambia cannot unilaterally ensure temporariness of the skilled because repatriation cannot be accomplished without the help of the host countries, and host countries currently have little incentive to send back the skilled. So, there is a strong case and considerable scope for cooperation between source countries like Zambia and destination countries in the design and implementation of migration policy so that unskilled migration becomes feasible and skilled migration takes a more desirable form." -- Cover verso.
