This book constitutes the proceedings of the 14th International Conference on Mobile and Contextual Learning, mLearn 2015, held in a cruise ship leaving from and arriving to Venice, Italy, in October 2015. The 22 revised full papers and 6 short papers presented were carefully reviewed and selected from 81 submissions. The papers deal with the topics related to the theme of the conference: "The mobile learning voyage: from small ripples to massive open waters". The conference theme paid tribute to the developments that brought mobile learning from its infancy steps in the early 2000s to maturity in 2015, while simultaneously paving the way for the broad and open waters ahead with new developments and progress in mobile learning, and emerging ambient technologies.

Religious Education in the Secondary School is a comprehensive, straightforward introduction to the effective teaching of Religious Education in the secondary classroom. Acknowledging the highly valuable yet often misunderstood contribution of RE, this text shows how the subject can be taught in a way that explores the impact of religion on the lives of people and society, engaging pupils and preparing them to become individuals who celebrate and respect diversity. It is illustrated throughout with ideas for teaching at different key stages and offers expert chapters introducing you to both the World Religions and the core aspects of effective teaching and learning. With an emphasis on developing an understanding of the importance - and different ways - of meeting the learning needs of all pupils, key chapters cover: -Understanding different pedagogies of RE -Spirituality and RE -Tips on effective planning and assessment -An approach to teaching across the Key Stages -Core subject knowledge in Buddhism, Christianity, Hinduism, Islam, Judaism and Sikhism Written by an experienced teacher, teacher educator and examiner, Religious Education in the Secondary School is a succinct compendium and has a real classroom applicability offering all trainee RE teachers, as well as those teaching Religious Education as specialists or non-specialists a wealth of support and inspiration.

From Sylvia Plath 's depictions of the Holocaust as a group of noncohering " bits " to AIDS elegies ' assertions that the dead posthumously persist in ghostly form and Susan Howe ' s insistence that the past can be conveyed only through juxtaposed " scraps, " the condition of being too late is one that haunts post-World War II American poetry. This is a poetry saturated with temporal delay, partial recollection of the past, and the revelation that memory itself is accessible only in obstructed and manipulated ways. These postwar poems do not merely describe the condition of lateness: they enact it literally and

figuratively by distorting chronology, boundary, and syntax, by referring to events indirectly, and by binding the condition of lateness to the impossibility of verifying the past. The speakers of these poems often indicate that they are too late by repetitively chronicling distorted events, refusing closure or resolution, and forging ghosts out of what once was tangible. *Ghostly Figures* contends that this poetics of belatedness, along with the way it is bound to questions of poetic making, is a central, if critically neglected, force in postwar American poetry. Discussing works by Sylvia Plath, Adrienne Rich, Jorie Graham, Susan Howe, and a group of poets responding to the AIDS epidemic, Ann Keniston draws on and critically assesses trauma theory and psychoanalysis, as well as earlier discussions of witness, elegy, lyric trope and figure, postmodernism, allusion, and performance, to define the ghosts that clearly dramatize poetics of belatedness throughout the diverse poetry of post – World War II America.

The present book examines both theoretical and practical aspects of the law on indications of geographical origin (IGOs) within the framework of European Union (EU) law, pursuing four distinct yet mutually related aims. First, it discusses theoretical issues of the law on IGOs including its historical foundations, terminology, principles of regulation, legal subjectivity, protection models and loss of protection. Second, it covers the EU law on IGOs from a systematic point of view. Particularly, the systematic review of the EU law on IGOs includes an in-depth analysis of and commentary on the relevant and applicable regulations. Third, it examines current legislative initiatives and further development options for the EU law on IGOs. Finally, it reveals the interrelation of the EU law on one hand and the national laws of EU Member States on the other with regard to IGOs, focusing on harmonized and non-harmonized areas of law.

Exploring British Politics is a concise, comprehensive and accessible guide to the subject. Fully updated and revised, the new edition covers the 2015 general election and recent developments in the role of political parties, changes in party ideology, the UK's relationship with the European Union, and the future of the UK itself. Designed to stimulate critical analysis and provoke lively debate, it provides new perspectives on two key themes – the health of British democracy and the transition from traditional models of government to more flexible forms of ‘governance’. The special features of the new edition include: Comprehensive analysis of the 2015 general election and the 2014 referendum on Scottish independence A focus on topical controversies, such as the relationship between politicians and the media and the arguments for and against Human Rights legislation Explanation of the ways in which British governments have responded to dramatic social change, and to serious economic challenges in an era of ‘globalisation’ Extensive guides to further reading at the end of each chapter Whilst it provides the essential historical background for a full understanding of British politics, contemporary issues are to the fore throughout and readers are encouraged to scrutinise what is often taken for granted and to develop their own thoughts and ideas. Whether studying the subject for the first time or revisiting it, Exploring British Politics is the ideal undergraduate text.

"Time Traveler, tells the story of the white-hot years of filmmaking in the 1890s and seeks nothing less than to restore Robert Paul to his rightful place in that scene. Paul improved upon the Kinetoscope (which Edison had neglected to patent in the UK). He also created the first movie camera in the UK and went on to unveil a highly effective projector called the Theatograph in 1896. Paul patented numerous devices, including a wireless telegraphy kit and submarine navigation devices that were instrumental in WWI. This book covers Paul's life, the race among inventors (including Edison, the Lumieres, and many

Recent developments in both Africa and Australia have brought the two continents closer together. In Africa, a resources boom, greater political stability, and the creation of the new regional institutions have contributed to economic and human development, even if many challenges including conflict, poverty and exploitation remain. Australia has commercial and political interests in Africa and, if it wants to be a significant global actor, must engage with both Africa's challenges and its growing international influence. Since coming to power in 2007, Australian Labor governments have pursued 'new

engagement' with Africa after decades of relative neglect. This book, the first study of its kind, explores the key contexts for and dimensions of contemporary Australian foreign policy towards Africa. It highlights a deepening of diplomatic and political relations, a trebling of the official aid budget to Africa, and over \$50 billion of Australian-based investment in Africa's resources sector, and suggests measures to make such engagement sustainable and of mutual benefit. Contributions to the book come from academics, civil servants, diplomats and politicians.

An unprecedented political, economic, social, and legal storm was unleashed by the United Kingdom's June 2016 referendum to leave the European Union and the government's response to the vote. After decades of strengthening European integration and independence, Brexit necessitates a deep understanding of its international law implications on both sides of the English Channel in order to chart the stormy seas of negotiating and advancing beyond separation. In *Complexity's Embrace*, international law practitioners and academics from the United Kingdom, Europe, Canada and the United States look beyond the rhetoric of "Brexit Means Brexit" and "no agreement is better than a bad agreement" to explain the challenges that need to be addressed in the diverse fields of trade, financial services, insolvency, intellectual property, environment, and human rights. The authors in this volume articulate, with unvarnished clarity, the international law implications of Brexit, providing policy makers, commentators, the legal community, and civil society with critical information they need to participate in negotiating their future within or outside Europe. *Complexity's Embrace* explores the many unprecedented questions about the UK's future trading arrangements. Contributors include Thomas Cottier, Armand de Mestral, Oonagh E. Fitzgerald, David A. Gantz, Markus Gehring, Valerie Hughes, Matthias Lehmann, Eva Lein, Dorothy Livingston, Richard Macrory, Luke McDonagh, Marc Mimler,

Government measures to reduce the liability of the state for supporting people in their retirement are being managed separately, without adequate consideration of their combined impact on the overall objective of increasing retirement incomes. There is no overarching programme or single accountability for encouraging people to save for retirement. The Treasury leads on overall savings strategy, and DWP on workplace saving but, without a whole system view there is a risk that individual, but co-dependent interventions may not be effective in increasing saving for retirement. Spending on the state pension and pensioner benefits increased from 5.5 per cent of GDP in 1990 to 6.9 per cent in 2011-12, in part because of the growing pensioner population, but also because of increased spending per capita on pensioner benefits. The Government expects to reduce the potential long-term spending liability by increasing the future state pension age, introducing automatic enrolment into workplace pensions and changing the state pension. However the existing initiatives to manage this problem face challenges. Government does not have a formal published strategy to influence employers. The success of encouraging saving for retirement through automatic enrolment into a pension also depends on the responses of individuals, pension providers and employers - in particular on the proportion of employees who remain with the schemes. The value of the UK state pension, as a proportion of pre-retirement earnings, has historically been low compared to other developed countries, and projections for future spending on state pensions and pensioner benefits may prove too optimistic
