One Potion in the Grave, it's Halloween in Hitching Post, Alabama, and potion shop owner Carly Bell Hartwell has an especially spooky customer to handle... With all the ghosts that haunt her at this time of year, Carly doesn't exactly rush to celebrate Halloween. Even a costume ball organized by her boyfriend Dylan's mother, Patricia Davis Jackson, holds little allure. But to please Dylan, who wants peace between the two women, Carly reluctantly agrees to go. Gossip around town is that architect Haywood Dodd plans to make a big announcement at the party. But before he can address the crowd, he's found dead with Patricia standing over him, holding the murder weapon. Anxious to clear Patricia's name and perhaps broker a truce with her, Carly would love to use her snooping skills to find the real killer. Only she has bigger problems to deal with—ghosts are flocking

Negotiating is a crucial skill for anyone running a business, but they don't teach this art in photography school. The Photographer's Guide to Negotiating gives specific tips for negotiating assignment deals, digital and electronic rights, stock photography sales, contracts, purchases, and more. Interviews with an art buyer, a photographer, and a photographer's rep give photographers extra insight-and maybe even the upper hand in many negotiations. Everyone negotiates in

Ansel Adams (1902-1984) produced some of the 20th century's most iconic photographic images and helped nurture the art of photography through his creative innovations and peerless technical mastery. *The Camera*--the first volume in Adams' celebrated series of books on photographic techniques--has taught generations of photographers how to harness the camera's artistic potential. This time-honored handbook distills the knowledge gained through a lifetime in photography and remains as vital today as when it was first published. Along with visualization, image management, Adams' famous Zone System, and other keys to photographic artistry, *The Camera* covers 35mm, medium-format, and large-format view cameras, while offering detailed advice on camera components such as lenses, shutters, and light meters.

Several decades have elapsed since the publication of any similar book in the German language. The lack of such a book has been felt keenly by all friends of astronomy. In our space age, astronomical knowledge arouses public interest more and more. Practical observation at the telescope depends more than anything else on such knowledge. The educational value of such a training is undisputed. On the other hand, the work of the amateur astronomer can also contribute essentially

to the work of the professionals. It is from these points of view that this handbook aims to help with versatile advice. At the same time, the book intends to show the wide range of applied astronomy, as it presents itself to the friend of the stars; in mathematical-physical fields, in precision mechanics and optics, and last but not least in the area of social relations. Beyond the circle of amateur astronomers the book is addressed to lecturers, teachers, students and pupils. It wishes to serve them as a guide to "astronomical experiments", which we suggest should be performed in primary and secondary schools, specialist colleges, and extramural courses.
