The physical chemistry text by Levine is a detailed text which I believe is best suited to the graduate student level. Someone who already has a basic understanding of physical chemistry, a solid calculus base, a course in matrix algebra, and a differential equations course can profit most from the detailed explanations in this book.

mathematics skills. It can help prepare the reader for an undergraduate course, serve as a supplementary text for use during a course, or serve as a reference for graduate students and practicing chemists. The text concentrates on applications instead of theory, and, although the emphasis is on physical chemistry, it can also be useful in general chemistry courses. The Third Edition includes new exercises in each chapter that provide practice in a technique immediately after discussion or example and encourage self-study. The first ten chapters are
